

CLEANING INSTRUCTIONS FOR PVC/ALU/LORYZA® PRODUCTS

The maintenance of gates and fences not only guarantees the aesthetic appearance of the house, but is also essential for the longevity of the equipment.

CLEANING AND MAINTENANCE OF PVC-ALU PRODUCTS

Once a year, simply clean it with warm soapy water and a soft cloth, then rinse with clean water.

These care instructions apply to both PVC and aluminum gates and fences.

Tip: When cleaning the gate, check and lubricate any visible mechanical parts.

Precautions: Never use solvents, acids, acetone-based or chlorinated products.

CLEANING AND CARE OF LORYZA® NATURAL PRODUCTS

CLEANING : Dirt can be easily removed with a low-pressure water jet (garden hose). A soft brush can be used for stubborn stains. If stains persist, light sanding (40-60 grit) is recommended.

MAINTENANCE: No special cleaning (apart from normal cleaning) is required. LORYZA® products can be stained, painted and/or varnished at a later date. Before this step, the products must be thoroughly cleaned and, if necessary, sanded. For maintenance and cleaning of stained, painted or varnished products, please refer to the manufacturer's recommendations, and care for them in the same way as for conventional products.
