# OUTDOOR LAYOUT

APRIL 2023

**GEPLAST**   
*Outdoor*

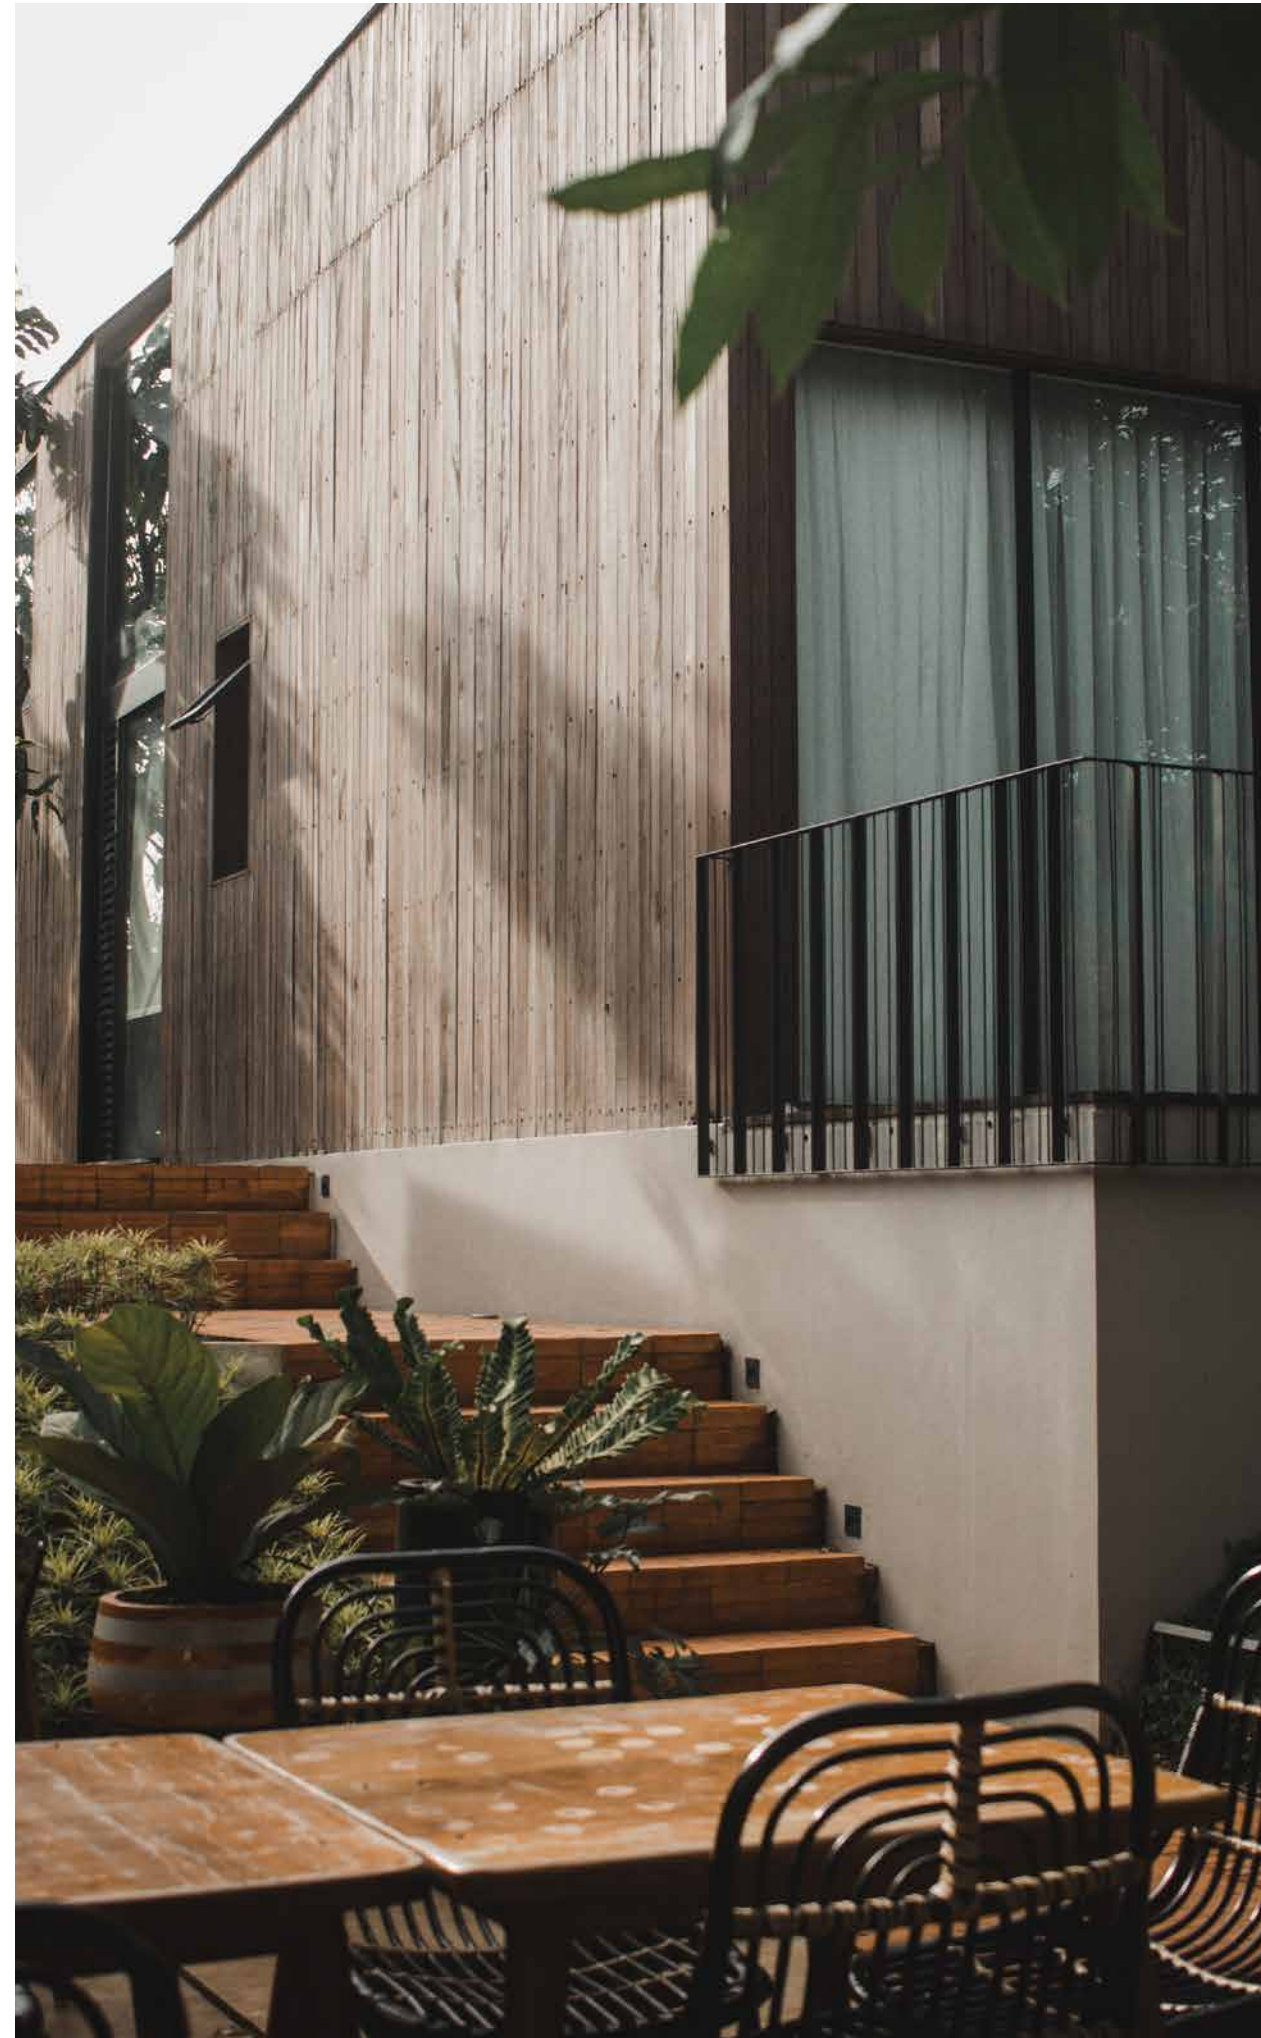

## OUR REASON FOR BEING

We like to recharge our batteries, go for a walk, cultivate our vegetable garden, smell the perfume of the roses at the end of spring, receive our guests around a big table, watch the children playing on the swing, offer a game of pétanque to our neighbor... the garden has become a second home where one seeks to create singular spaces.

GEPLAST Outdoor is designed to secure your property, to delimit your living spaces and to create new ones...

So welcome and let's start by taking a look at the owner...

## SUMMARY

# GEKO

Eco-designed by nature

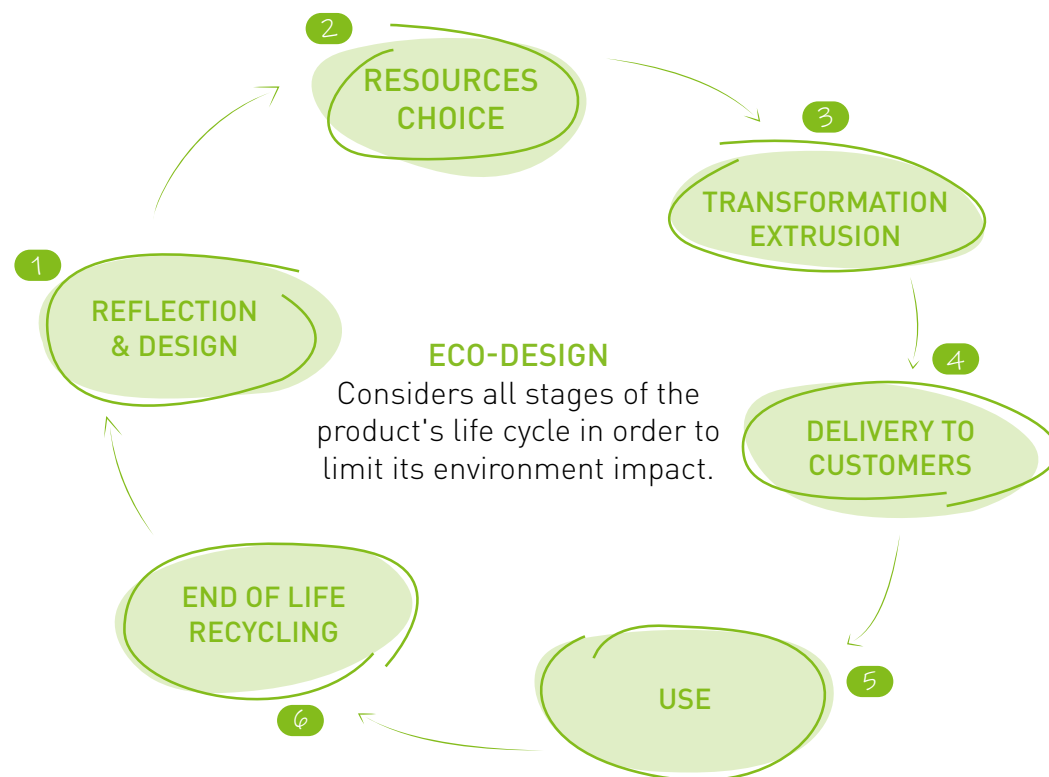

From the outset, the products in the GEKO range are part of a **decarbonized** and **sustainable life cycle**. As a matter of principle, and as far as possible, recycled materials will be used. **All offcuts are sorted, crushed and re-extruded.**

In addition to recycled material, GEKO uses alternative composites, from almost inexhaustible agricultural resources or bio-sourced materials.

In the manner of a "gecko", a type of lizard found in many parts of the world, the products in the range meet three basic requirements :

- **eco-responsibility** → nature
- **product quality** → agility
- **customized solutions** → great adaptability

A symbol of Geplast's commitment to environmental protection, GEKO is a new green experience in the history of building, simply because it is "Eco-designed by nature".

# 37%

of our processed materials are recycled materials, or 2,773 tons in 2022.

## RESOURCES CHOICE

- 100% recycled PVC, obtained through the management of our offcuts transformed into extruded co-products or from our local recycling partners.
- Use of bio-sourced materials such as Loryza®. Composed of 60% natural material (rice husk), it contains a much lower proportion of petroleum than virgin PVC.

At Geplast, 200 tons of recycled material are used per month to make our products, representing 30% of our total production.

*At Geplast, 200 tons of recycled material are used per month to make our products, representing 30% of our total production.*

## TRANSFORMATION EXTRUSION

We favor co-extrusion\* for the development of our GEKO products. The visible outside is made of 0.5 mm of virgin material to keep the technical aspects on the surface and the inside is made of recycled material.

The eco-design of our products also involves thinking about energy savings, for example by changing the cooling system of our machines. They will be more energy efficient.

*\*This extrusion process makes it possible to obtain a product combining two different formulations to form a single product.*

## REFLECTION & DESIGN

Reflection is the starting point for the design of a product. So we think about the composition of the products, the technical performances we want to obtain as well as the materials to use. The goal is to reduce our environmental footprint as much as possible.

## END OF LIFE RECYCLING

The lifespan of PVC products is 30 years. They are then recovered and recycled by waste treatment companies. Once this step is completed, Geplast takes back the recycled material to create new profiles and products.

## DELIVERY TO CUSTOMERS

The next step is to deliver our customers. To limit our carbon footprint, our deliveries are optimized to avoid round trips.

## USE

Our customers generate co-products;

## REDUCING OUR FOOTPRINT

The eco-design of our products also involves reducing our carbon impact. Since 2018, Geplast's R&D department and the firm EVEA have been conducting a study to calculate the carbon costs of our recycled materials and measure the energy consumption of some of our extrusion lines. This questioning is formalized by the EPR which should be implemented in 2023 and which should over the years require manufacturers to establish Life Cycle Analyses (LCA) in order to produce Environmental and Sanitary Declaration Sheets (ESDS) for each product, which will be published in the Inies database and verified by the control bodies.

# THE MATERIALS

*"Because it takes good products and know-how to design good profiles."*

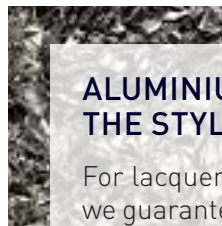

As for many products, the quality of the raw material is a key condition. This is even more true for products related to the world of outdoor design, permanently exposed to the vagaries of the weather (rain, wind, heat, humidity ...). With this in mind, GEPLAST has chosen to source almost exclusively from a resin manufacturer recognized for its expertise in order to extrude 100% French profiles in its Saint-André-de-la-Marche (49) plant.

Fully integrated in a continuous improvement process, the raw material is certified and controlled at all stages of production, allowing us to guarantee it over the long term.

## PVC THE GUARANTEE OF DURABILITY

PVC is a 100% recyclable material with many advantages: multi-purpose, resistant to external aggressions (UV, precipitation, fire), non-oxidizing, easy to maintain, decorative and with excellent insulating properties.

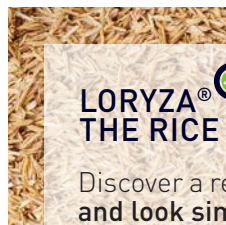

## ALUMINIUM THE STYLISH SURE THING

For lacquered aluminum products, we guarantee a sufficient thickness of lacquer layer, its adherence, its good polymerization, its resistance to corrosion and the resistance of the color of your gate to UV and outdoor exposure.

For plated aluminum products, we provide a 15-year warranty on the color and durability of the films.

## LORYZA® THE RICE HUSK THAT REINVENTS WOOD

Discover a resolutely contemporary material that offers a touch and look similar to wood but without its constraints.

ECO  
RESPONSIBLE

### A PRODUCT WITH HIGH ADDED VALUE

- > No splinters
- > Pleasant to the touch
- > Easy to clean
- > Waterproof
- > UV resistant
- > No splintering
- > No decomposition
- > Resistant to insects and fung
- > Customizable customizable

### A UNIQUE AND AWARD-WINNING MATERIAL

Loryza® is made from rice husks, a hitherto little-used food residue that requires no specific cultivation or deforestation. It is a particularly exceptional material because of its intrinsic qualities and the comfort it provides in terms of stability, feel and maintenance. Loryza® is an **eco-responsible product and is guaranteed for 15 years.**

### AWARDED PRIZES

PRODUCT DESIGN AWARD  
Category Design Materials 2016

## Please read carefully before installing any of our outdoor products

Before starting the work, check that all the profiles are homogeneous in color and that they are not scratched. Depending on the collection chosen, the PVC profiles can undergo slight variations in color. For our rice hull based products, slight variations can be observed from one strip to another depending on the origin of the hull.

For storage, carton kits and packages should be placed on a dry, level surface in a well-ventilated area out of direct sunlight so that they do not distort.

In case of sun exposure, dark and plaxed colors can cause a deformation of the boards by dilation of the external face: bimetal effect. The characteristics of the site, and particularly the exposure to the sun, are major elements that we do not control. If the product supplied does not meet these characteristics, the customer will be held solely responsible. To limit this effect, we recommend the use of ALU reinforcements in dark-colored PVC and Loryza® slats and panels from 1m20 in length.

The length of the profiles must be checked and cut if they are too long.

The gate models are compatible with conventional motorization systems, for swinging or sliding openings.

Concerning the accessories (hinges, clamps...), we ask you to inquire with your usual supplier.

Touch-up pens are available for plated colors.

Geplast SAS declines all responsibility and will cancel its guarantee in case of non-compliance with the above instructions for use.

*Non contractual document. We reserve the right at any time and in a concern of evolution of our profiles, to bring all modifications which we will judge useful.*

# OUR RANGES

## Sistä

Make your fence a decorative element to enhance your garden. The SISTÄ range is resistant to bad weather, frost and salt air and is available in 4 collections: Prestige, Trend, Simplicity and Authenticity.

Prestige, the new collection offers all the posts and accessories in plated ALU. You will be able to coordinate your structures and fillings thanks to the different colors and even give a real wood look to your fence!

The Tendance collection relies on a mix of materials: ALU, PVC and Loryza®. This combination ensures modernity and robustness.

Simplicity, this 100% PVC collection offers a wide range of colors to meet all your desires.

The Authenticity Collection is the 100% Loryza® fence that provides a wood-like appearance without the constraints.

To give originality to your exteriors, the SISTÄ range can also accommodate the BRIZÄ filling and our two decorative panels «broken glass» and «plant».

## Gates & fences surface-mounted frame

The range of gates and fences with surface-mounted frames has been modernized.

Discover the new references with more refined, modern and harmonious lines that are consistent with all our ranges.

## Sitadel

SITADEL is a range of gates with clean and contemporary lines composed of 2 collections: **Prestige and Tendance**. Also, it harmonizes perfectly with the SISTÄ range of fences.

SITADEL is available in both swing and sliding gates and can meet all technical needs and aesthetic desires. Its little plus? Its structure is invisible, which allows the same appearance on each side.

The **Prestige Collection** is the big news of this year 2023! Resistant to external aggressions due to its composition in ALU, this plated collection offers many colors and possibilities. Its manufacture is simple and fast, thanks to a simplified machining.

The **Tendance collection** leaves the choice of filling to the user and allows you to mix materials according to your desires: Loryza®, PVC, ALU.

## How to choose your gate

**Opening**  
**Slider**  
 Saves space. Responds to a problem of setback on your property.

**Casement**  
 Allows the size of the leaves to be adapted to the terrain.

**Privacy**  
**Obscure**  
 Provide a deterrent effect. Be protected from prying eyes.

**Confidence**  
 Protect children and animals. See without being seen.

**Overview**  
 See completely outside. Bring in the light.

## CLEANING PVC - ALU

PVC and aluminium are cleaned in the same way: wash using warm soapy water with a soft nonabrasive sponge and rinse with clean water.

**Precautions:** Never use solvent, acid, nor acetone-based or chlorinated products.

## CLEANING LORYZA®

**Maintenance:** No special cleaning (apart from normal cleaning) is required.

**Cleaning:** Dirt can be cleaned off easily using a low-pressure (garden) hose. A soft brush can be used for stubborn marks. If these marks remain, they can be lightly sanded (40-60 grit).

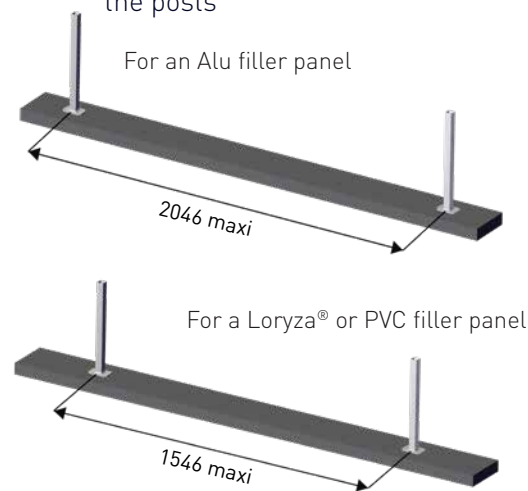

After installing your fence, we recommend rinsing Loryza® filler panels with a hose to remove dust due to brushing. This will avoid rings forming after the first rain.

# SISTÄ installation instructions

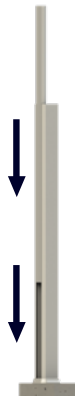

**STEP 1** Prepare the centre spacing between the posts

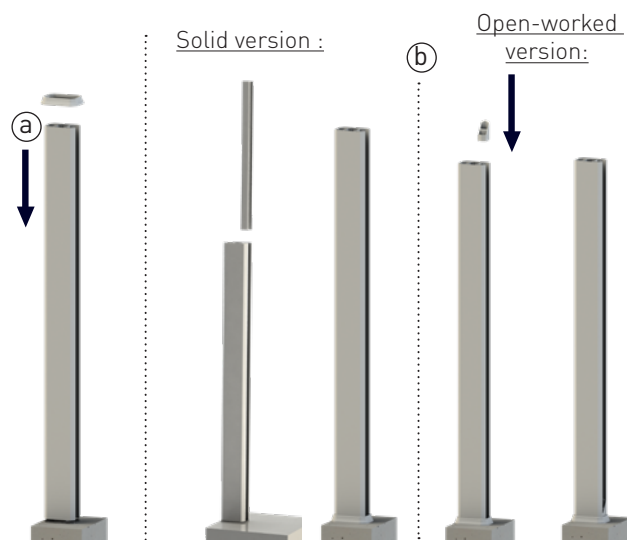

This measurement includes allowance for expansion

**STEP 3** Cut the posts to the desired height (refer to the height chart on page 30).

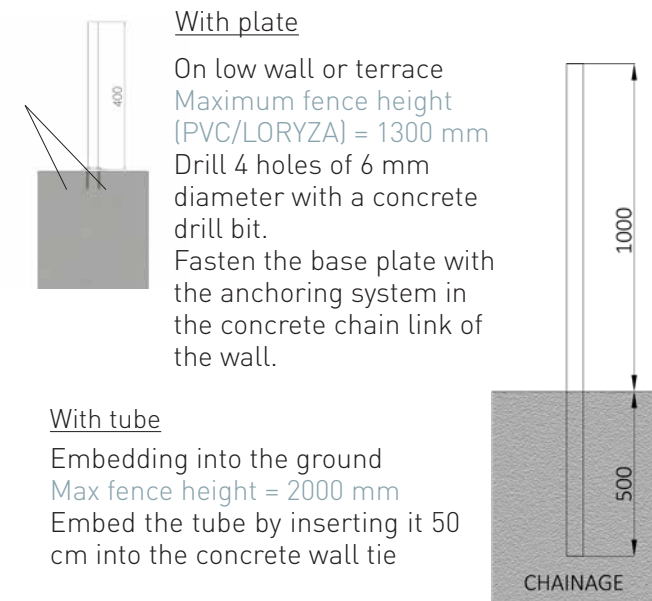

**STEP 4** Slide the U groove covers into the first and last post of your fence.

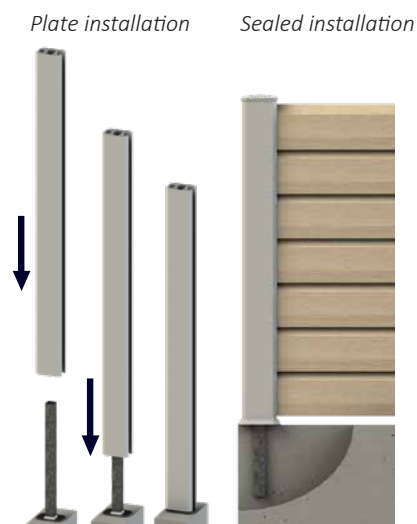

**STEP 6** (a) Slide on the end plates and then (b) insert the reduction profile for the solid version and the starting spacers for the openwork version.

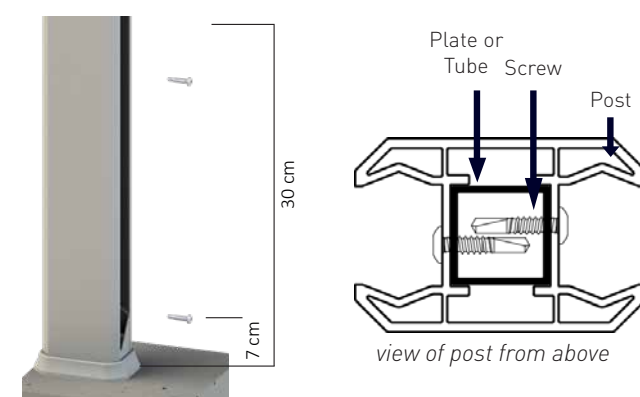

**STEP 2** Fasten the supports

**STEP 5** Insert the posts

**STEP 7** Fix the posts on the supports (plate or tube to be embedded).

Screw 2 self-drilling screws on each side of the posts, respecting the heights indicated opposite (openwork version).

# Version pleine

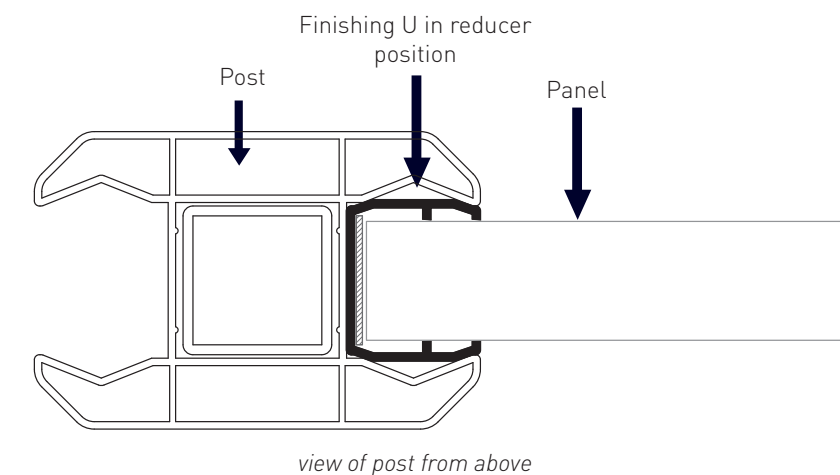

**STEP 8** Fit the panels and inserts together in the chosen configuration

**STEP 9** Clip the finishing profile on the last panel

**STEP 10** Insert a U reducer into the post to compensate for the thickness of the panel (24 mm). Slide the panels as one into the posts, leaving a gap of 5 mm on each side.

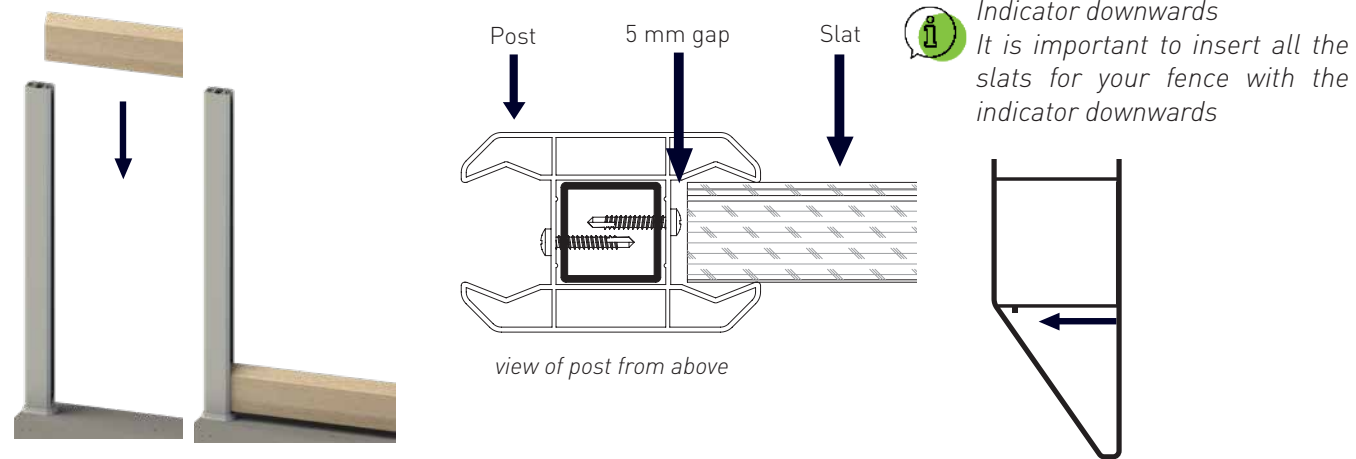

A reinforcement must be inserted in each panel for PVC or Loryza® fillings to avoid the «bimetal» effect.

**STEP 11** Glue and insert the caps onto the posts (PVC glue).

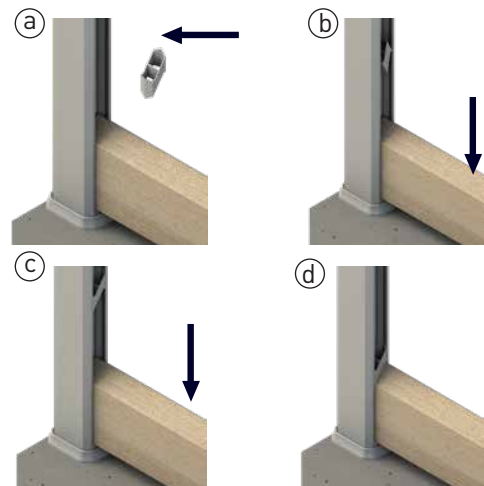

## Open-worked version privacy slat

**STEP 8** Slide the slat inside the posts leaving a 5 mm gap on each side.

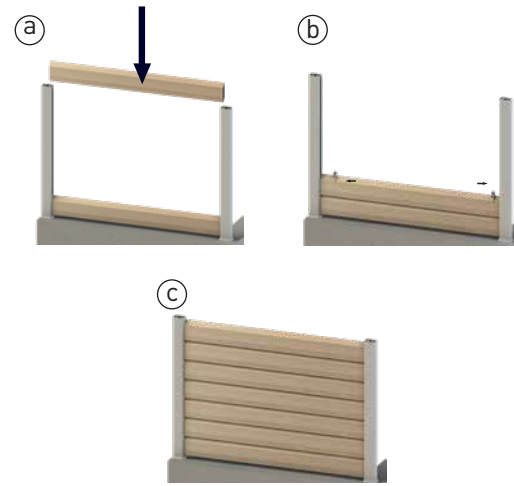

**i** A stiffener should be slid into each slat PVC or Loryza® fillers, to avoid the "bimetallic" effect.

**STEP 9** Insert the first intermediate spacers above each end of the slat.

**STEP 10** Slide in the next slats, repeating steps 8 and 9, up to the desired height.

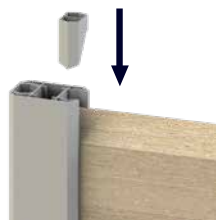

### DECOR PANEL OPTION :

Replace two privacy filler slats by one decor panel CL131. For the installation of your decor panel, please refer to the assembling principle on page 28.

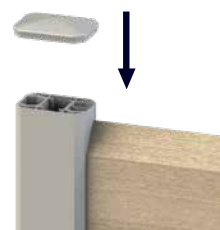

Please do not forget the CL125 profiles.

**STEP 11** Insert the final spacers in the posts.

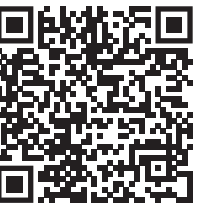

**STEP 12** Glue and insert the caps onto the posts (PVC glue).

## Open-worked version Brizä slat

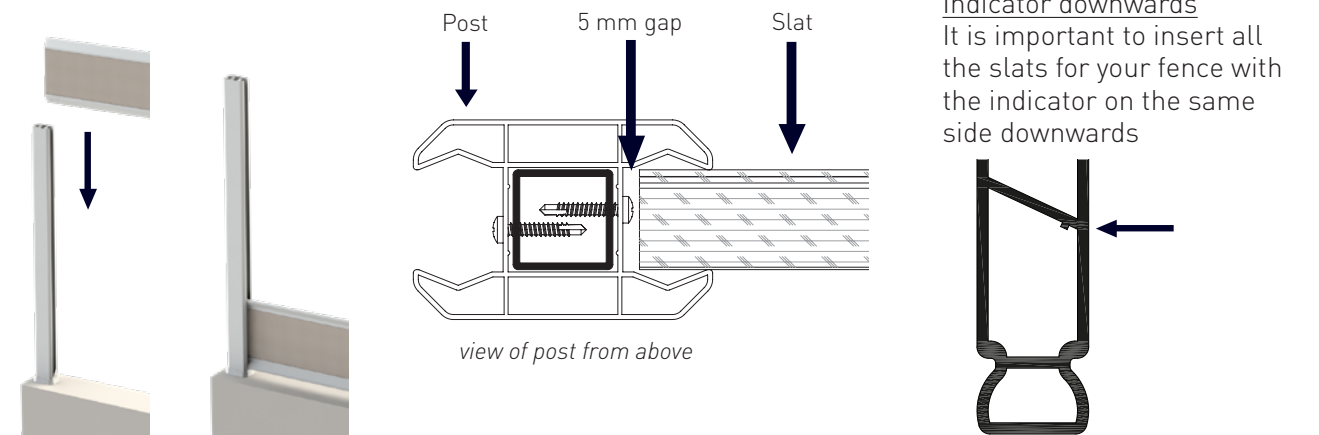

Scan the QR code to discover the assembly of brizä slat

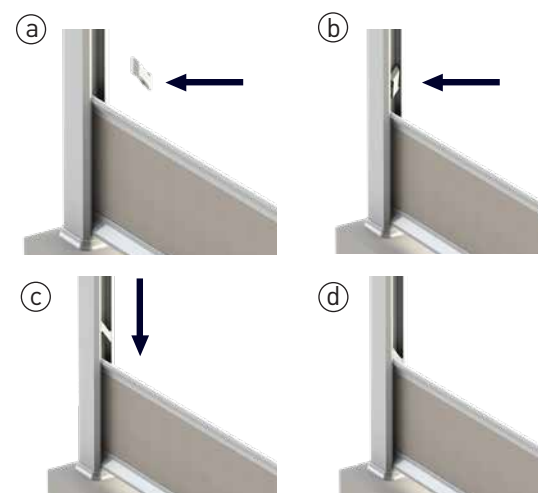

**STEP 8** Define the shape of your blade by inserting the CL125\_AL aluminum profiles on the CL126 or BS018 board or on the CL130 / CL131 decor panel.

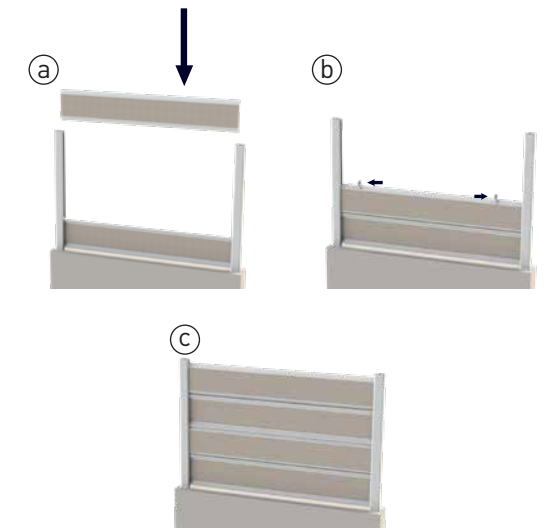

**STEP 9** Slide the slat inside the posts leaving a 5 mm gap on each side

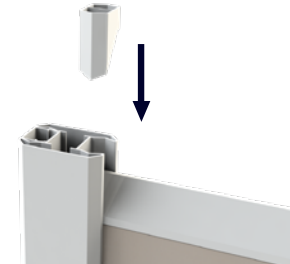

**STEP 10** Insert the first intermediate spacers above each end of the slat.

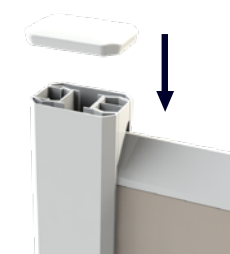

**STEP 11** Slide in the next slats, repeating steps 9 and 10, up to the desired height.

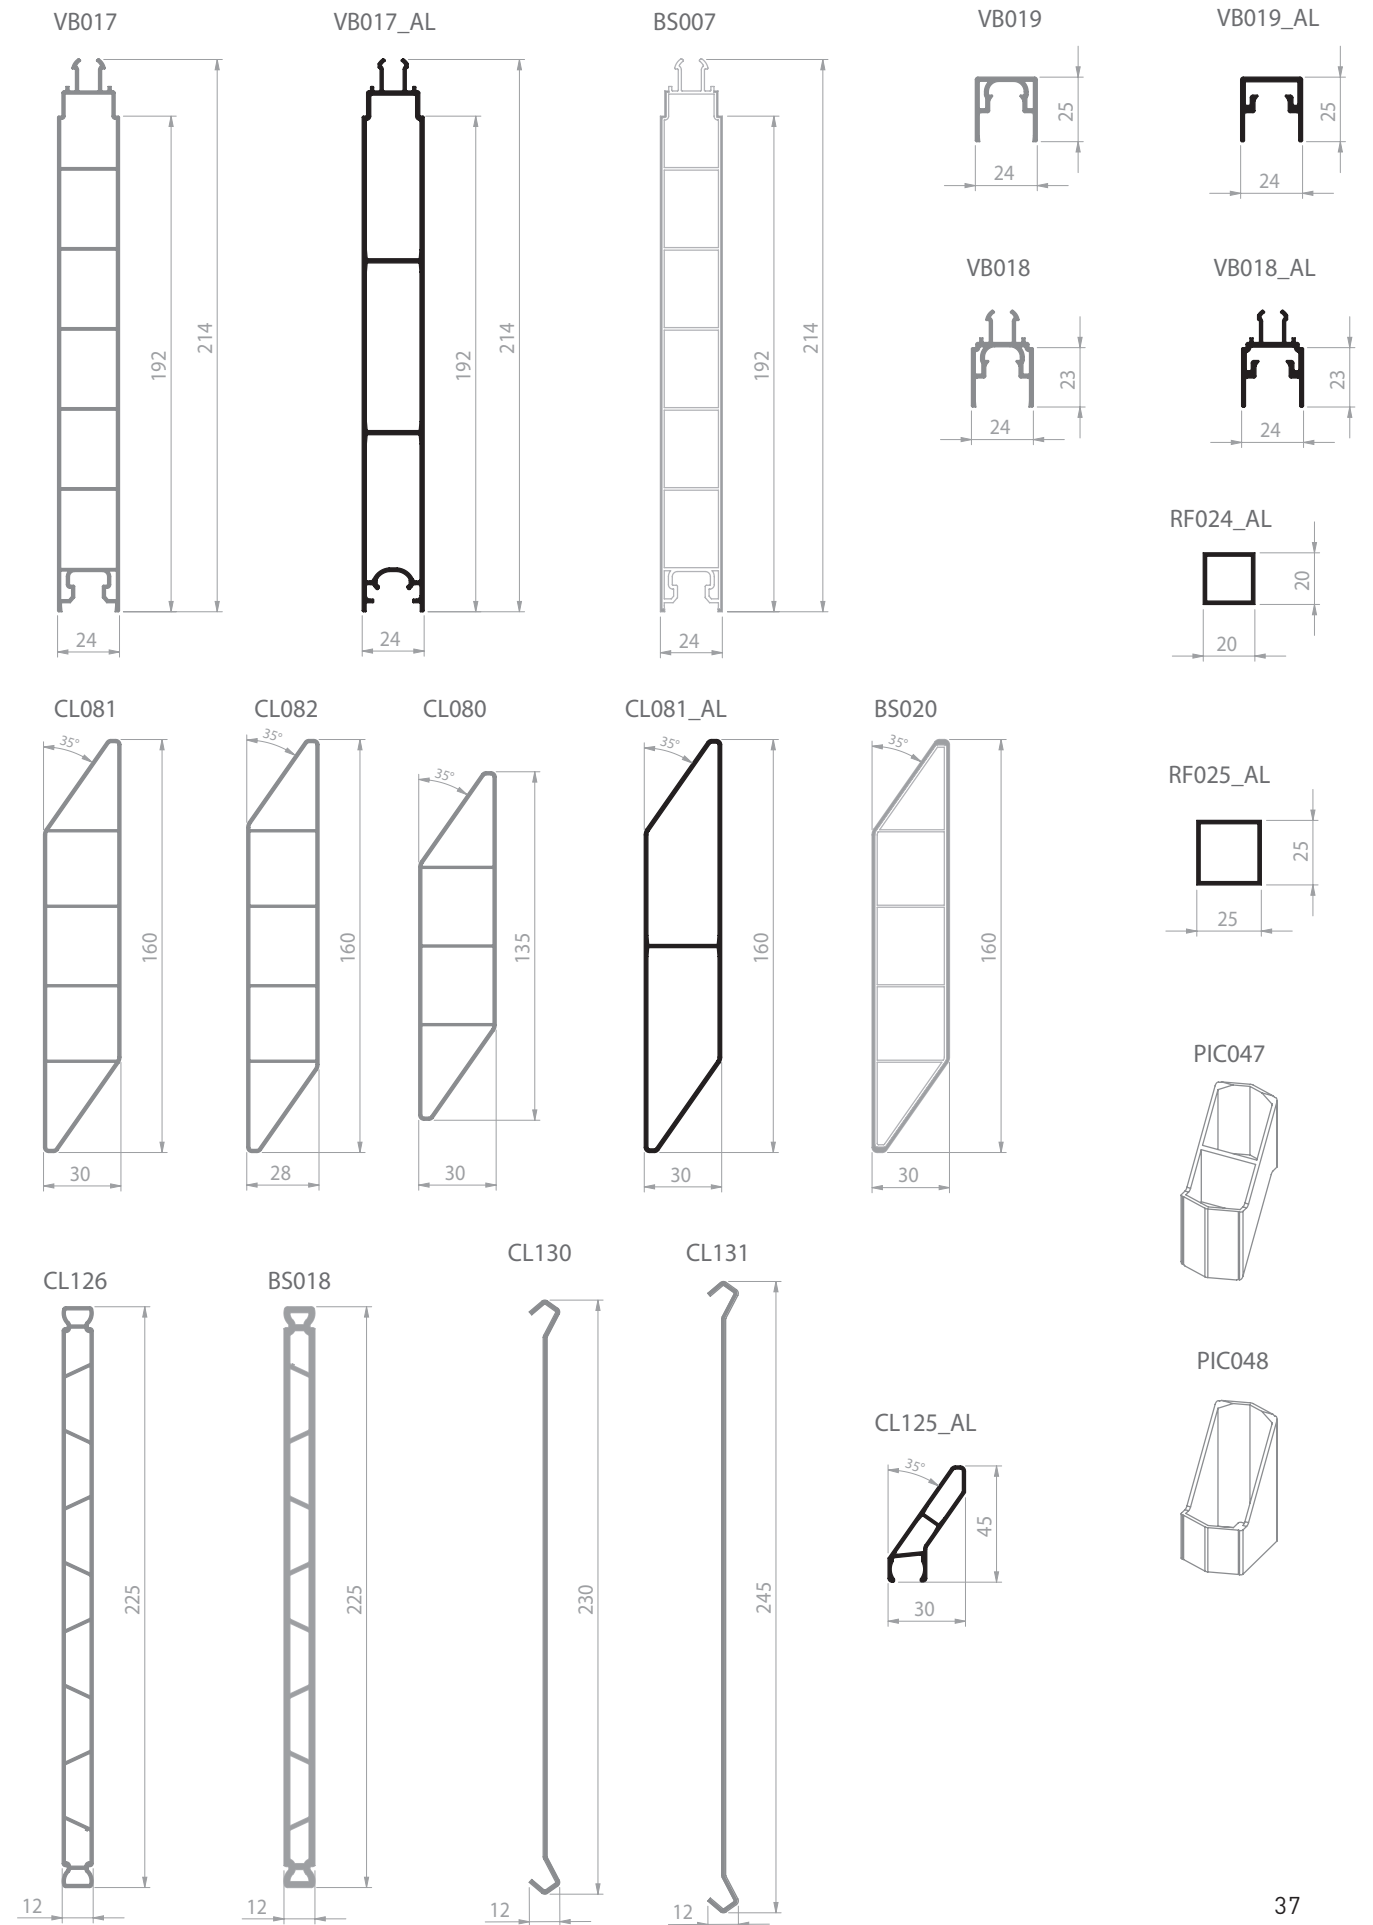

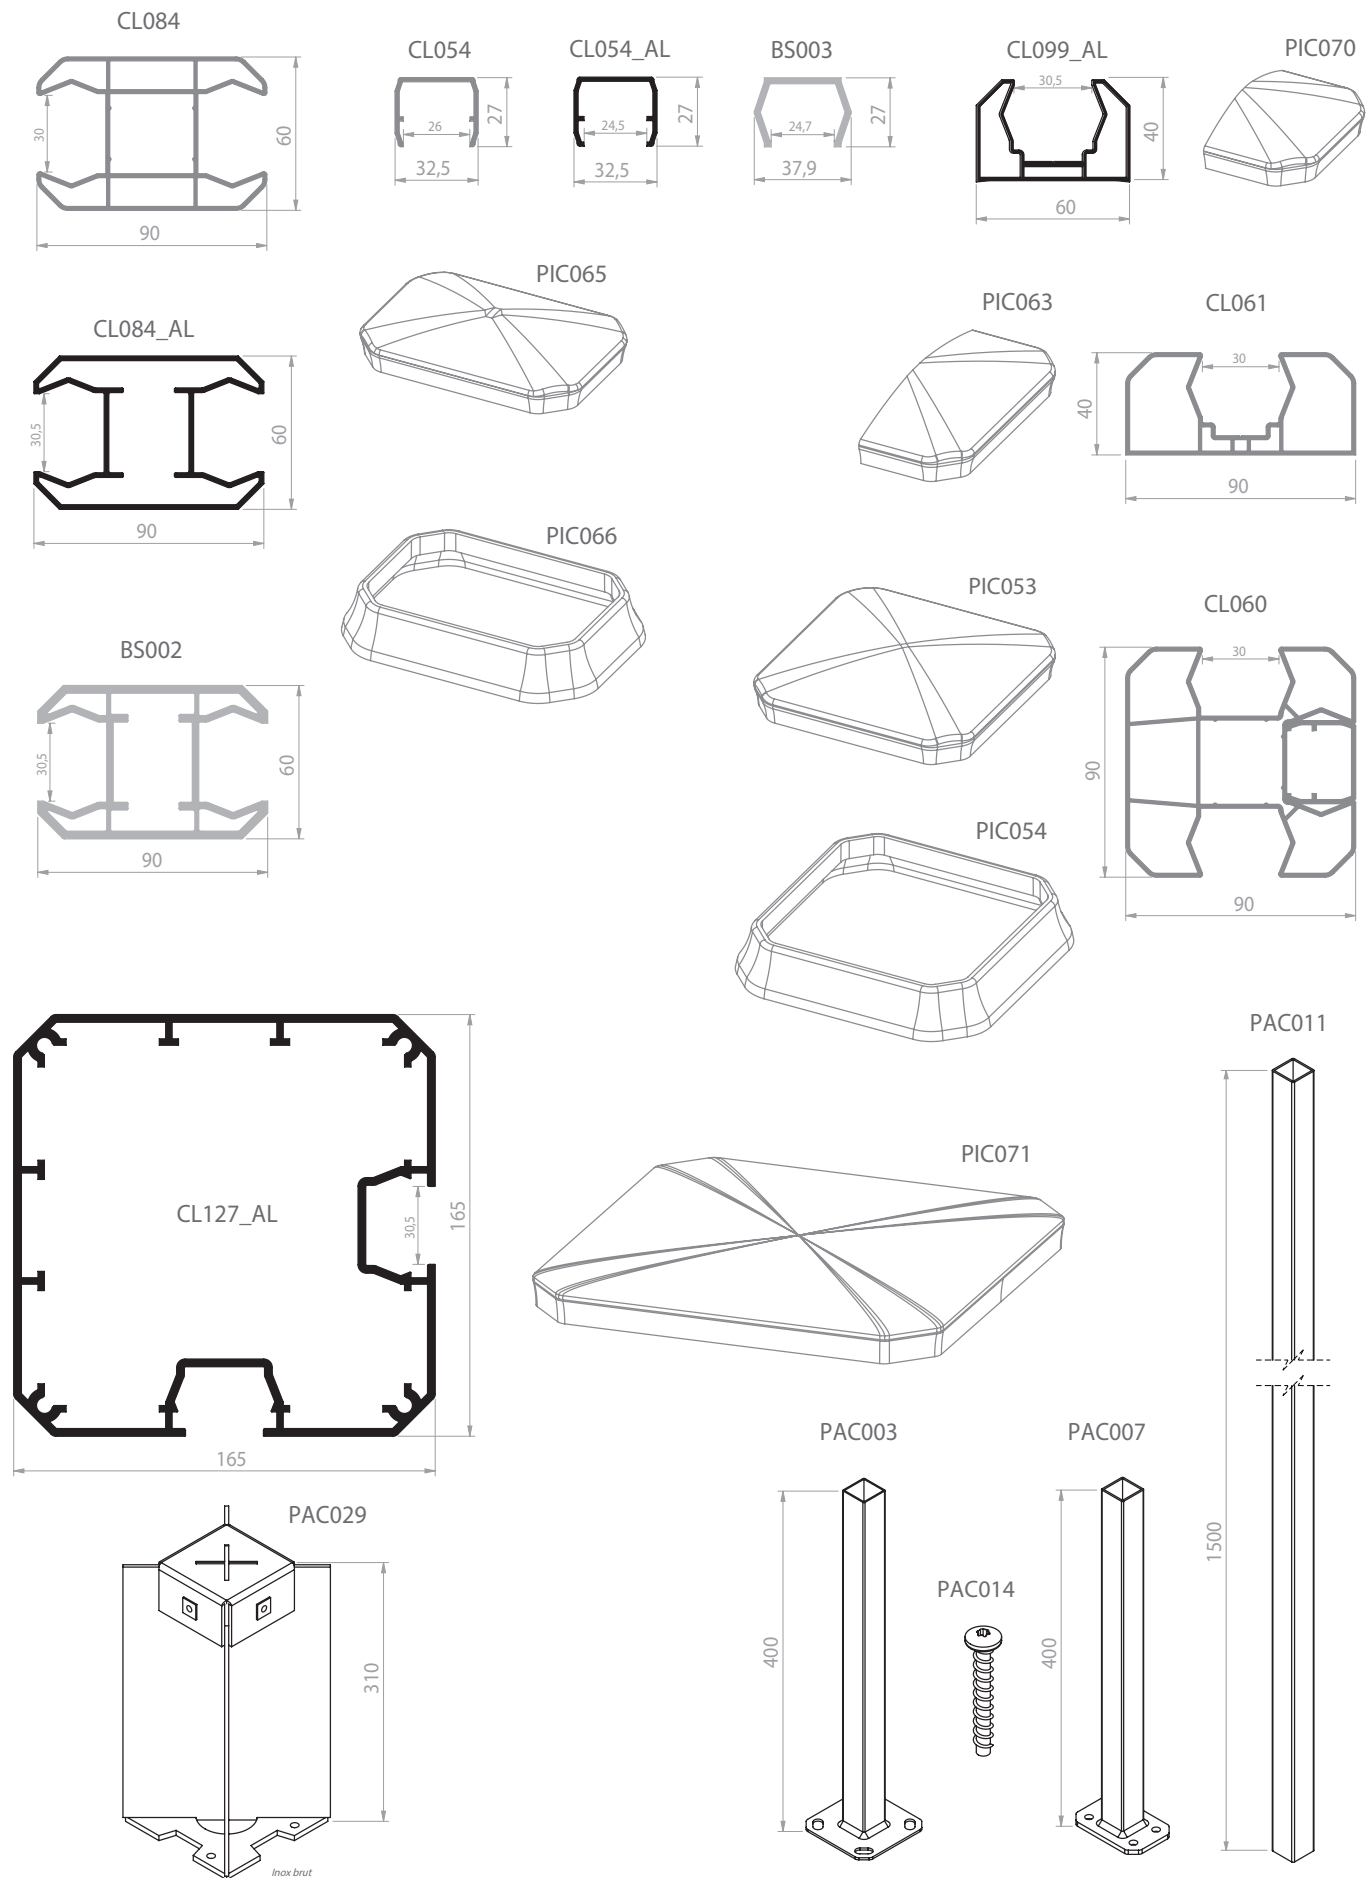

**STEP 12** Insert the final spacers in the posts.

**STEP 13** Glue and insert the caps onto the posts (PVC glue).

# SISTÄDEL

## THE MULTI-PURPOSE POST

Compatible with the Sistä and Sitadel range

### Its strong points

#### FEATURES

- > Designed to fix a gate, wicket and/or integrate a fence
- > A size of 165 x 165 mm allowing a good compromise between rigidity and aesthetics
- > Possibility to insert a reinforcement in the post for more rigidity

#### ORIGINALITY, DESIGN AND CUSTOMIZATION

- > Designed to integrate with the SISTÄ fence and SITADEL gate range, both in terms of design and technology
- > Customizable thanks to the SISTÄ fence profile available in many colors, including its new translucent version which allows the integration of an LED strip

#### EASY TO IMPLEMENT

- > Choice of: sealing or fixing on a plate

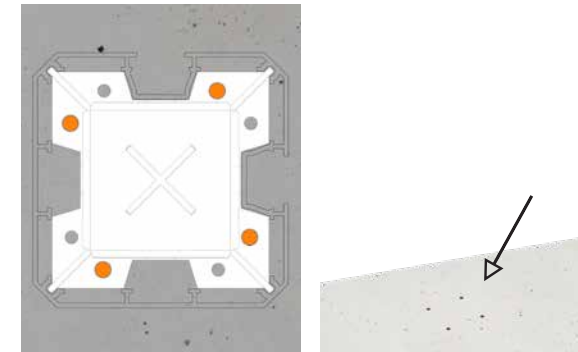

### Principle of installation with plate\* ON CONCRETE FOOTINGS

\*Recommendation for swing gates: not motorized and maximum size of the leaf - Ht x L : 1,50 m x 1,50 m

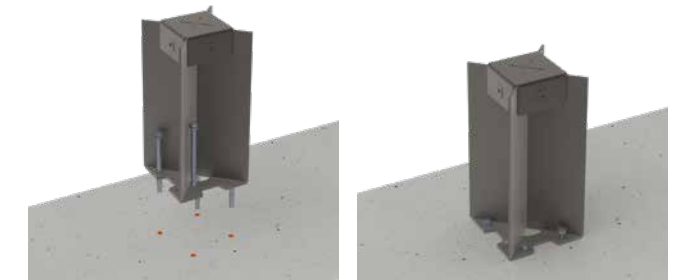

#### Step 1 :

Drill 4 holes of diameter 10 on the concrete support.

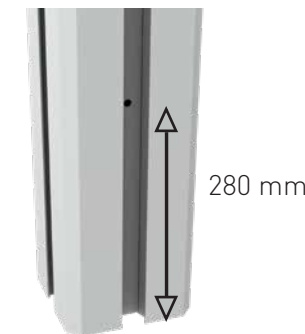

#### Step 2 :

Fix the plate with anchoring systems such as 10x100 dowels in the concrete chain link. To adjust its level and plumbness, use the M8 bolts to screw into the tapped holes.

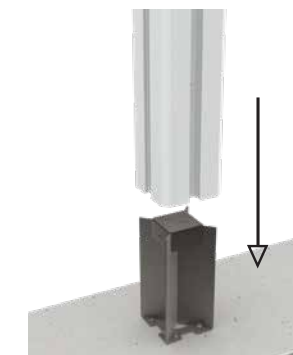

#### Step 3 :

Drill a 9 mm diameter hole in the center of each groove, 280 mm from the bottom of the post.

#### Step 4 :

Slide the post onto the plate.

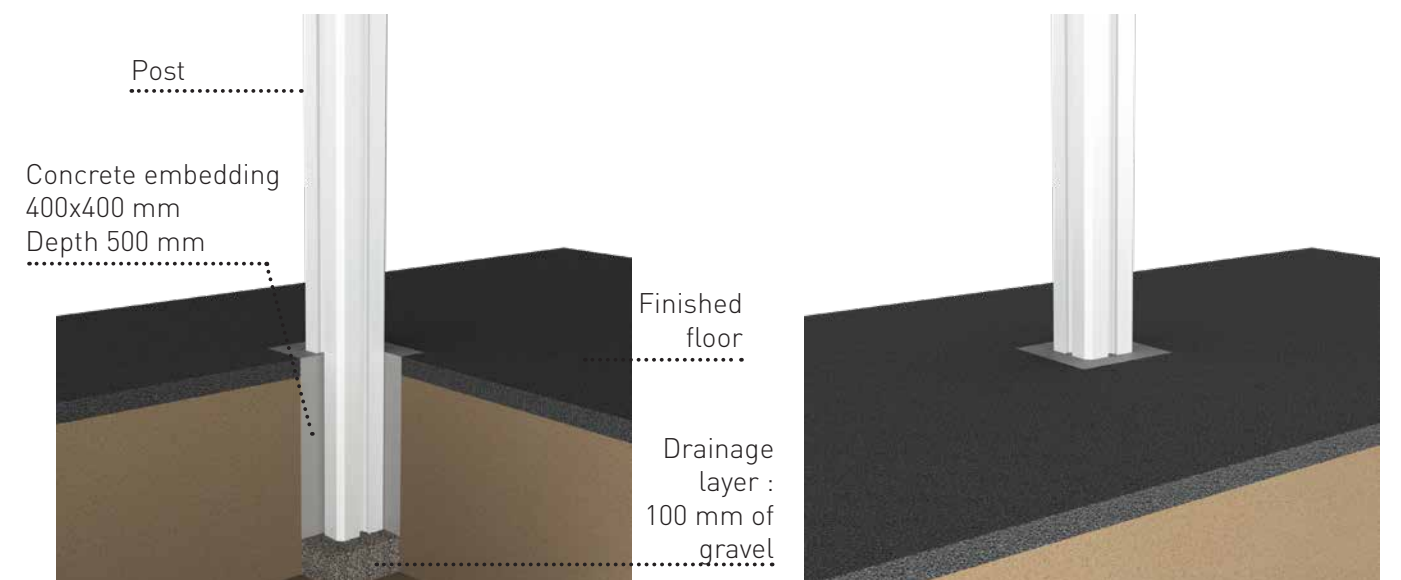

#### Step 5 :

Lock the post on the plate by screwing M8 bolts through the 2 holes.

**I – CHAMP D'APPLICATION**

Les ventes de la société GEPLAST (ci-après « notre Société » ou « nous ») sont soumises aux présentes conditions générales, auxquelles le client adhère sans réserve et qui prévalent sur toute condition d'achat et toute clause contraire indiquées sur les documents du client, sauf dérogation formelle et expresse de notre part.

Aucun retard ni aucune omission de notre part à nous prévaloir à un moment donné de l'une quelconque des présentes conditions ne peut être interprété comme une renonciation à nous prévaloir de ladite condition. Si l'une des conditions prévues aux présentes venait à être annulée ou rendue inopposable au client, en tout ou partie, ce dernier resterait tenu de l'ensemble des autres conditions.

**II – FORMATION DU CONTRAT**

Toute commande reçue du client, proposition ou devis émis par notre Société, doit faire l'objet d'une confirmation de commande de notre part, acceptée par le client.

C'est cette confirmation de commande qui nous engage, ainsi que le client, et fait foi en cas de contestation ultérieure. Seule la confirmation de commande acceptée par les deux parties peut déroger aux présentes conditions générales. En cas de contradiction avec la confirmation de commande, seule cette dernière prévaut.

Nos plans, dessins, études, photos, brochures, catalogues, etc., restent notre entière propriété.

**III – LIVRAISON - DELAIS**

Sauf mention contraire dans notre confirmation de commande, les délais de livraison ne sont qu'indicatifs et sans garantie. Aucune indemnisation ou résolution du contrat ne pourra être consentie en cas de retard.

Toutefois, en cas de retard de plus 8 semaines après la date indicative de livraison, non imputable à un cas de force majeure, le client pourra demander la résolution de la vente, sans pénalité de part et d'autre après mise en demeure restée infructueuse. Les acomptes versés devront être restitués au client sous huit jours.

Le client accepte que la livraison des produits commandés soit globale, ou seulement partielle sous réserve de l'en informer préalablement.

En toute hypothèse, l'exécution de la commande ne peut intervenir que si le client est à jour de ses obligations envers notre Société.

**IV – LIVRAISON - TRANSFERTS DES RISQUES - RETOURS**

La livraison de nos marchandises et de leurs emballages est réputée effectuée dans nos entrepôts. Le transfert des risques au client s'effectue dès l'enlèvement des marchandises.

Le client dispose d'un délai de 10 jours à compter de la mise à disposition des marchandises pour en prendre possession. Passé ce délai, les risques lui seront transférés, et le client sera redevable de pénalités de stockage égales à 1% du prix des marchandises, par jour de retard, sans préjudice de tous autres dommages et intérêts justifiés.

Lors de la réception, le client ou son représentant est tenu de vérifier l'état des marchandises et leur conformité avec la commande.

Notre Société est dégagée de toute responsabilité concernant des erreurs de quantité, avaries ou vices apparents constatés après la signature du bon de livraison et/ou la lettre de voiture.

La défectuosité partielle d'une livraison ne peut justifier son rejet total.

A l'exception des cas de non-conformité ou de vice reconnus, les produits ne pourront être repris. Aucun produit ne peut être renvoyé sans notre accord écrit préalable et nos instructions pour la réexpédition.

Pour les profils livrés par containers métalliques, il est rappelé que les containers restent la propriété inaliénable de notre Société et doivent nous être restitués. A défaut de restitution, le coût des containers (350 €HT/pièce) sera facturé au client.

**V – TRANSPORT**

A défaut de convention contraire, le transport des marchandises est à la charge du client.

Si le transport est effectué par nos soins ou confié à un tiers transporteur, il est expressément admis que c'est à la demande du client et à ses risques et périls, y compris lorsque le prix est stipulé franco. Il appartient donc au client de prendre toute disposition en cas d'avaries ou de manquants, conformément aux dispositions des articles L133-3 et suivants du Code de Commerce.

Sauf dérogation formelle et expresse de notre part, aucune clause ne pourra être considérée comme dérogeant aux règles susvisées.

**VI – GARANTIE – RESPONSABILITE**

Conformément aux articles 1641 et suivants du Code civil, nos produits bénéficient de la garantie légale des vices cachés, ainsi que celle relative aux vices apparents dès lors que, s'agissant de ces derniers, ceux-ci auront été signalés par le client ou son représentant lors de la réception.

En cas de produits tiers intégrés à nos propres produits, notre Société ne saurait accorder plus de garantie que celle due et consentie par les fournisseurs et fabricants desdits produits tiers.

Dans tous les cas, si la non-conformité ou le vice est reconnu, la responsabilité de notre Société se limitera, à notre choix, soit à l'échange ou à la remise en état du produit ou de l'élément non-conforme ou défectueux, soit au remboursement de la commande, à l'exclusion de toute indemnité ou dommages-intérêts, pour quelque cause que ce soit, notamment pour frais de main d'œuvre, démontage, remontage, immobilisation, frais de transport, etc.

La garantie ne joue pas en cas de conditions de stockage ou mise en œuvre non conformes aux règles de l'art, inappropriées ou contraires à nos directives, en cas de négligence, de mauvais entretien ou utilisation inappropriée ou non conforme à la destination de nos produits.

**VII – PRIX - CONDITIONS DE PAIEMENT**

Nos prix sont stipulés hors taxes et hors emballage et nos marchandises sont toujours facturées au prix en vigueur au jour de la confirmation de commande, la TVA étant en sus au taux en vigueur à la date de la facturation. Les frais de paiement tels que frais de virement, frais de conversion, frais de douane, sont à la charge du client.

Les factures sont payables à notre siège social à 30 jours nets date d'expédition, sauf convention expresse contraire de notre part. Si une commande s'exécute en plusieurs livraisons, les factures afférentes à chacune des expéditions sont payables au fur et à mesure de leur émission sans attendre l'exécution entière de la commande.

De plus, conformément aux dispositions de l'article L.441-10 du Code de commerce, tout retard de règlement ou toute prorogation d'échéance emporte de plein droit l'application d'un intérêt de retard calculé prorata temporis, égal au taux d'intérêt appliqué par la Banque centrale européenne à son opération de refinancement la plus récente majoré de 10 points de pourcentage.

En outre, tout retard de paiement non autorisé par notre Société entraîne l'exigibilité, à titre de clause pénale pour retard, d'une indemnité fixée forfaitairement à 10 % du prix, outre le versement de l'indemnité forfaitaire de recouvrement de 40 € prévue à l'article L.441-10 du Code de commerce et qui pourra être majorée des frais de recouvrements réels exposés (si supérieurs à cette dernière).

**VIII – IMPAYES - CLAUSE RESOLUTOIRE**

En cas de défaut de paiement, quarante-huit heures après une mise en demeure restée infructueuse, la vente sera résiliée de plein droit si bon nous semble et notre Société pourra demander restitution des produits, sans préjudice de tous autres dommages et intérêts. La résolution frappera non seulement la commande en cause mais aussi toutes les commandes impayées antérieures, qu'elles soient livrées ou en cours de livraison et que le paiement soit échu ou non.

En cas de paiement par effet de commerce, le défaut de retour de l'effet sera considéré comme un refus d'acceptation assimilable à un défaut de paiement. De même, lorsque le paiement est échelonné, le non-paiement d'une seule échéance entraînera l'exigibilité immédiate de la totalité de la dette sans mise en demeure.

Dans tous les cas qui précèdent, les sommes qui seraient dues pour d'autres livraisons ou pour toute autre cause deviendront immédiatement exigibles si notre Société n'opte pas pour la résolution des commandes correspondantes. Notre Société pourra également, si bon lui semble, suspendre l'exécution de toute commande en cours.

**IX – DETERIORATION DE LA SOLVABILITE OU DE LA SITUATION FINANCIERE DU CLIENT**

En cas de détérioration de la solvabilité ou de la situation financière du client, nous pouvons, à notre choix, soit annuler la commande, soit exiger le paiement à l'avance ou encore exiger des garanties complémentaires. En cas d'ouverture d'une procédure collective contre l'acheteur, nous pourrions annuler la commande dans la mesure où le droit local applicable à cette procédure le permet.

**X – FORCE MAJEURE - IMPREVISION**

Tout cas de force majeure entraînera de plein droit la suspension des délais d'exécution de nos engagements et nous donnera la faculté, le cas échéant, de les résilier.

En aucun cas notre responsabilité ne pourra être engagée en cas de force majeure nous mettant dans l'impossibilité de livrer ou d'exécuter la commande.

La force majeure telle qu'entendue au sens des présentes inclut notamment, de manière non exhaustive : la pandémie, la guerre, la mobilisation, la grève totale ou partielle, le lock-out, le retard de nos fournisseurs, le bris de machine, les difficultés d'approvisionnement en matières premières, composants, équipements ou en énergie, l'incendie ou tout autre événement dont nous n'aurions pas la maîtrise, de nature à empêcher ou réduire les fabrications ou les livraisons.

En cas de modification importante des conditions économiques en vigueur lors de notre acceptation d'une commande, de nature à rendre l'exécution excessivement onéreuse pour nous (notamment le prix de la matière première) nous nous réservons le droit de renégocier les conditions de cette commande et de la résilier en cas d'impossibilité d'accord.

**XI – RESPECT DE NOS PRECONISATIONS**

L'utilisation conforme des produits commercialisés par notre Société nécessite le respect scrupuleux des préconisations notamment de sélection, de stockage, de pose, d'utilisation et d'entretien stipulées dans nos notices, guides, cahiers, catalogues, fiches d'entretien et autres documents techniques.

Ces documents sont consultables librement sur notre site internet [www.geplast.fr](http://www.geplast.fr)

Ces documents peuvent également être remis au client sur simple demande de sa part.

Le client s'engage à les porter à l'attention des utilisateurs intermédiaires et finaux.

En toute hypothèse, le client s'engage à ne pas entreprendre une quelconque utilisation ou action sur les produits commercialisés sans s'être enquis préalablement des éventuelles préconisations relatives auxdits produits. Le non-respect de ces préconisations s'oppose à tout remplacement, réparation, remboursement ou indemnisation d'aucune sorte.

Ces préconisations sont notamment les suivantes, sans caractère d'exhaustivité, et sans pouvoir se substituer à une étude attentive et au respect scrupuleux des documents techniques relatifs à chaque produit, et en cas de doute, à en référer préalablement à notre Société :

**Vérification de la compatibilité des produits et adéquation aux besoins du client**

Le client se doit de vérifier l'adéquation de nos produits et de leurs spécificités techniques à ses besoins, attentes et aux utilisations qu'il compte en faire.

En cas d'utilisation prévue de nos produits en combinaison ou incorporation avec d'autres produits dont nous n'avons pas préalablement garanti la compatibilité, que ces produits proviennent de notre Société ou de tiers, il appartient au client de s'assurer préalablement de l'adéquation et de la compatibilité des produits entre eux et plus généralement de la faisabilité technique de l'opération, dans des conditions raisonnables.

**Vérification de l'état des produits avant utilisation et test de mise en œuvre**

Les produits commercialisés par notre Société, qu'ils soient composés de matière synthétique (par exemple le PVC ou ABS), végétale ou hybride (par exemple la gamme Loryza) peuvent présenter des nuances de réalisation, notamment dans leur apparence (différences de teintes, imperfections des matériaux, etc.) et des nuances au niveau des longueurs.

En cas de mise en œuvre spécifique des produits, il appartient au client de procéder à des tests préalables.

**Conditions de stockage et d'entretien des produits**

Les produits doivent être stockés et entretenus dans des conditions normales et usuelles permettant d'assurer la préservation de leur structure, propriétés et apparence, notamment à l'égard des aléas climatiques, atmosphériques, de température, de luminosité ou autre, quelle que soit leur source, et en tout cas conformément à nos préconisations spécifiques lorsque celles-ci existent. De façon générale, les produits doivent être stockés à l'abri du soleil, des intempéries et de l'humidité.

Notamment, pour le stockage, les produits doivent être empilés sur une surface sèche et plane, dans un endroit frais et bien ventilé, à l'abri de la lumière, de manière à ne subir aucune déformation ou décoloration.

Les profils, composée à 100% de PVC, doit être entretenue à l'eau tiède savonneuse avec une éponge douce non abrasive et rincée à l'eau claire. Aucun solvant, acide, produit à base d'acétone ou chloré ne doit être utilisé. Pour le stockage, les kits cartons comme les paquets doivent être posés sur une surface sèche et plane, dans un endroit bien ventilé de manière à ne subir aucune déformation.

**XII - DROIT DE PUBLICITE**

Toute utilisation par le client de l'une de nos marques ou dénomination sociale sera subordonnée à notre accord écrit et préalable.

**XIII – DONNEES PERSONNELLES**

Dans le cadre des relations contractuelles avec le client, notre Société a recours à des moyens informatiques destinés à gérer plus facilement la commande du client, à satisfaire aux obligations légales ou réglementaires et à adresser les documents commerciaux au client. Certaines des données ainsi collectées, requises pour la conclusion ou la bonne exécution du ou des contrat(s), peuvent concerner une ou plusieurs personnes physiques identifiées ou identifiables agissant dans le cadre de leur activité professionnelle. Elles répondent dans ce cas à la qualification de données personnelles au sens de la réglementation nationale et européenne en vigueur. Notre Société est alors considérée comme le Responsable du Traitement

Ce faisant, notre Société s'engage à respecter en toutes circonstances la réglementation applicable au traitement de données à caractère personnel, et en particulier le règlement (UE) 2016/679 du Parlement européen et du Conseil du 27 avril 2016 applicable à compter du 25 mai 2018 (ci-après « le RGPD ») et la loi n°78-17 du 6 janvier 1978 relative à l'informatique, aux fichiers et aux libertés.

Notre Société s'engage également à ne faire appel ou à ne collaborer qu'avec des prestataires ou partenaires s'y conformant également.

Conformément à la réglementation, les données sont conservées le temps de la relation commerciale entre notre Société et le client puis pour une durée de 3 années après l'expiration de celle-ci, à des fins statistiques, ceci sans préjudice d'éventuelles obligations légales ou réglementaires d'archivage de données lorsque celle-ci existent et de la conservation rendue nécessaire à l'établissement de la preuve d'un droit ou d'un contrat qui peuvent être archivés conformément aux dispositions du Code de commerce.

Les personnes physiques objets du traitement disposent en toute hypothèse, relativement aux données les concernant, d'un droit d'accès, de rectification, d'effacement, de limitation, d'opposition, de portabilité, du droit de ne pas faire l'objet d'une décision individuelle automatisée (y compris le profilage) et d'un droit de recours auprès de la CNIL.

**XIV - RESERVE DE PROPRIETE**

LES PRODUITS VENDUS RESTENT NOTRE PROPRIETE JUSQU'AU PAIEMENT EFFECTIF DE L'INTEGRALITE DU PRIX EN PRINCIPAL ET ACCESSOIRE. A CET EGARD, NE CONSTITUE PAS UN PAIEMENT AU SENS DE LA PRESENTE CLAUSE, LA REMISE D'UNE TRAITE OU DE TOUT AUTRE TITRE CREANT UNE OBLIGATION DE PAYER.

LE DEFAUT DE PAIEMENT DE L'UNE QUELCONQUE DES ECHEANCES PEUT ENTRAINER LA REVENDICATION DES PRODUITS.

LE CLIENT S'ENGAGE JUSQU'A COMPLET PAIEMENT DU PRIX, A PEINE DE REVENDICATION IMMEDIATE DES PRODUITS PAR NOTRE SOCIETE, A NE PAS TRANSFORMER NI INCORPORER LESDITS PRODUITS, NI A LES REVENDRE OU LES METTRE EN GAGE.

EN TOUTE HYPOTHESE, LES PRODUITS ENCORE EN POSSESSION DU CLIENT SONT REPUTES ETRE CEUX IMPAYES.

LE CLIENT S'ENGAGE EN OUTRE A NOUS PREVENIR IMMEDIATEMENT DE SON ETAT DE CESSATION DE PAIEMENT, A PROCEDER OU LAISSER PROCEDER DES L'OUVREMENT DE LA PROCEDURE COLLECTIVE DE REDRESSEMENT OU LIQUIDATION JUDICIAIRE AU CONSTAT D'EXISTENCE DANS SON STOCK DE MARCHANDISES IMPAYEES NOUS APPARTENANT ET A NOUS FOURNIR TOUT RENSEIGNEMENT PERMETTANT D'EXERCER LA REVENDICATION A L'EGARD DES SOUS-ACQUEREURS.

CES DISPOSITIONS NE FONT PAS OBSTACLE AU TRANSFERT AU CLIENT, DES LA LIVRAISON, DES RISQUES DE PERTE ET DETERIORATION DES PRODUITS VENDUS AINSI QUE DES DOMMAGES QU'ILS POURRAIENT OCCASIONNER.

**XV – LOI APPLICABLE - REGLEMENT DES LITIGES**

TOUTES LES CONTESTATIONS RELATIVES A NOS VENTES A A L'EXECUTION OU A L'INTERPRETATION DE NOS CONDITIONS GENERALES DE VENTE SONT SOUMISES AU DROIT FRANÇAIS ET SERONT DE LA COMPETENCE EXCLUSIVE DU TRIBUNAL DE COMMERCE DE NANTES (FRANCE), MEME EN CAS D'APPEL EN GARANTIE OU DE PLURALITE DE DEFENDEURS.
