At the service of your projects

For over 20 years, our team has been dedicated to your projects. Thanks to our expertise in the design and extrusion of profiles, we are able to offer you quality products, innovative and efficient solutions to meet all your expectations.

Geplast Building brings together the entire product range for building professionals in the field of joinery and closure.

Some of our PVC profiles are certified QB59 (mass-coloured finish profiles) and QB33 (profiles with plaxed finish) by the CSTB. For more information, please visit our website : www.geplast.fr.

Our expertise

Tooling creation

Profile extrusion

Finishing plating, bending

Logistics

Recycling

The advantages of PVC

It contains less petroleum than other major thermoplastics and therefore has a much smaller carbon footprint. 100% recyclable, insulating and durable over time, PVC brings performance and resistance to our products.

THERMAL INSULATION

Both flexible and rigid, PVC has excellent insulating thermal and phonic properties.

GOOD VALUE FOR MONEY

PVC is one of the most competitive materials on the market. Less expensive than wood and aluminum, the manufacture of PVC remains simple and its use is multiple.

MAINTENANCE

Very resistant, the PVC is not sensitive to pollution and external aggressions. Therefore, its maintenance is minimal, a little water and soap are enough.

DIMENSIONAL PROPERTIES

PVC has good dimensional stability and limited shrinkage due to its particularly resistant structure.

FIRE REACTION

Composed of 57% chlorine from salt, PVC is hardly flammable and extinguishes itself once the fire is under control.

CHEMICAL RESISTANCE

With its excellent stability, PVC does not change when subjected to chemicals (salts, alcohols, grease, mineral oils...).

40%

of our processed materials are recycled materials, or 2394 tons a year.

GEKO
Eco-designed by nature

From the outset, the products in the GEKO range are part of a **decarbonized and sustainable life cycle**. As a matter of principle, and as far as possible, recycled materials will be used. **All offcuts are sorted, crushed and re-extruded.**

In addition to recycled material, GEKO uses alternative composites, from almost inexhaustible agricultural resources or bio-sourced materials.

Similar to a "gecko", a type of lizard found in many parts of the world, the products in the range meet three basic requirements :

- **eco-responsibility** → nature
- **product quality** → agility
- **customized solutions** → great adaptability

A symbol of Geplast's commitment to environmental protection, GEKO is a new green experience in the history of building, simply because it is "**Eco-designed by nature**".

REFLECTION & DESIGN

Reflection is the starting point for the design of a product. So we think about the composition of the products, the technical performances we want to obtain as well as the materials to use. The goal is to reduce our environmental footprint as much as possible.

RESOURCES CHOICE

- **100% recycled PVC**, obtained through the management of our offcuts transformed into extruded co-products or from our local recycling partners.
- Use of bio-sourced materials such as Loryza®. Composed of **60% natural material** (rice husk), it contains a much lower proportion of petroleum than virgin PVC.

At Geplast, 200 tons of recycled material are used per month to make our products, representing **37%** of our total production.

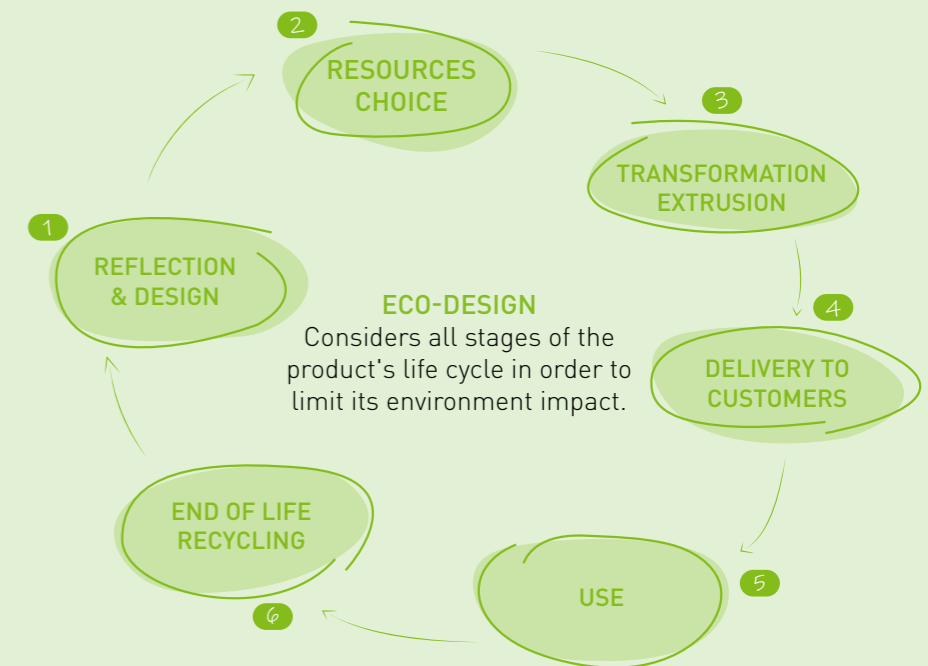

For example, the proportion of recycled material in our new IrYs box is **98%**, more than **80%** in our window treatments and **60%** for our products made of Loryza® material for the outdoor range.

TRANSFORMATION EXTRUSION

We favor co-extrusion* for the development of our GEKO products.

The visible outside is made of 0.5 mm of virgin material to keep the technical aspects on the surface and the inside is made of recycled material.

The eco-design of our products also involves thinking about energy savings, for example by changing the cooling system of our machines. They will be more energy efficient.

**This extrusion process makes it possible to obtain a product combining two different formulations to form a single product.*

DELIVERY TO CUSTOMERS

To limit our carbon footprint, our deliveries are optimized to avoid round trips.

USE

Our customers generate co-products which we recover and purchase for re-use.

END OF LIFE RECYCLING

The lifespan of PVC products is 30 years. They are then recovered and recycled by waste treatment companies. Once this step is completed, Geplast takes back the recycled material to create new profiles and products.

REDUCING OUR CARBON FOOTPRINT

The eco-design of our products also involves reducing our carbon impact. Since 2018, Geplast's R&D department and the firm EVEA have been conducting a study to calculate the carbon costs of our recycled materials and measure the energy consumption of some of our extrusion lines. This questioning is formalised by the EPR, which was introduced in 2023 and which should over the years require manufacturers to carry out Life Cycle Analyses (LCAs) in order to produce Environmental and Health Declaration Sheets (EHSDSs) for each product, which will be published in the Inies database and checked by inspection bodies.

MORE LABEL

For the fifth year running, Geplast has been awarded the first European label recognising our commitment to reducing the environmental footprint associated with the manufacture of our products by promoting the use of recycled raw materials.

Awarded by the French Plastics and Composites Federation (Fédération de la Plasturgie et des Composites), the MORE label (MO bilisés pour RE cycler) is proof of our progress in incorporating recycled materials into the production of our profiles.

Our range of boxes

Geplast offers the widest range of roller shutter boxes on the market, in order to respond to all installation problems. Whether for new construction or renovation, whatever your joinery, you will find a solution adapted to your situation.

The technical specifications of each box are available in PDF format on request. Please contact our customer service.

IrYs® HALF-LINTEL BOX

Made from 98% recycled material.

It meets the requirements of sustainable construction and the RE2020.

The first box on the market to obtain a technical opinion for window widths of up to 3.50 m.

FoKus® INTERIOR WINDING BOX

Available in 3 sizes :
168, 205 and 235 mm

FoKus® perfectly meets the new energy standards : thermal, acoustic and aeraulic. These values are certified by PV of the CSTB and the FCBA.

GVR.r PVC EXTERIOR RENOVATION BOX

Access to the mechanism from the inside, ideal for collective housing.

Preserves the intrinsic performance of the joinery.

Reno City® EXTERIOR RENOVATION BOX

Perfect for the renovation of your buildings.

Ideal with solar motorization use.

GVR.e EXTERNAL WINDING BOX

Ideal for new generation buildings with thermal insulation from the outside.

Adaptation on all PVC, ALU and WOOD joineries.

IrYs®

HALF-LINTEL BOX

Designed to be part of a sustainable construction approach, the new IrYs half lintel box is made from **98% recycled material**.

It therefore meets the challenges of the **RE2020** (lowcarbon construction) and offers genuine **thermal and acoustic insulation and airtightness performance** for the end user.

installation

PLANKS IRYS® (200 MM) FOR HALF LINTEL INSTALLATION

PLANKS IRYS® (160 MM) FOR INSTALLATION ON TIMBERFRAME HOUSE AND EXTERIOR THERMAL INSULATION

A TECHNICAL RESPONSE

IrYs® is mainly suitable for two types of installation :

- Traditional masonry with maximised winding at $\varnothing 200$,
- Timber frame with maximised winding at $\varnothing 160$.

It is compatible with all types of solar protection : **Lame Bioclimatique®**, long-span slats for **XXL bays** up to **3.50 m**, standard market slats, **BSO** and **insect screens** (better management of solar gain, avoids overheating in buildings in summer and considerably reduces the use of air conditioning).

The assembly of this patented box is fast and industrial:

- simple clipping of end caps, brackets and integration of tulips and brackets (no screws and no silicone),
- the support lugs system is easy to install, there is no need for steel reinforcement,
- after-sales service is facilitated by the removable drawers

PACK SIZES

	VR071	VR072	VR073
Bars of 6 ml / pack	2	2	2
Bars of 6 ml / container	30	100	150

FoKus®

INTERIOR WINDING BOX

FoKus® is available in 3 sizes :
168, 205 and 235 mm.

A TECHNICAL RESPONSE

The FoKus® box has several features. **It can be installed on all types of joinery** thanks to the patented universal adaptor concept. Compatible with all maneuvers, it can be used with PVC or ALU aprons and rails

FoKus® is compatible with **the bioclimatic slat** and can also accommodate a **BSO (Solar shading)**. It also has the option of **"Underside access"** to facilitate maintenance work from the inside.

Customizable thanks to its many available finishes (mass-coloured, plaxed or aluminum filmed).

CERTIFIED PERFORMANCE

THERMAL :

- Uc = 0,76W/m².K. with 120 mm frame (FoKus 168 mm)
- Uc = 0,82W/m².K. with 120 mm frame (FoKus 205 mm)
- Uc = 1,32W/m².K. with 120 mm frame (FoKus 235 mm)

ACOUSTIC :

- Dn,e,w + Ctr 54 dB in standard configuration (PV CSTB) (FoKus 168mm & 205mm)
- Dn,e,w + Ctr 56 dB with VMC ventilation (FoKus 168mm & 205mm)
- Dn,e,w + Ctr 57 dB with acoustic insulation (FoKus 168mm & 205mm)

AERAULIC :

- Air flow : C*4 with motor, winch and TSL and C*3 with strap
- Wind : V*4 in 3 ml width

DURABILITY TESTS :

- 1,000 pressure/vacum cycles without screwing down the inner reinforcement

FOKUS®
BOX IN
VIDEO

The FoKus® interior roller shutter box range combines all the requirements for tomorrow's buildings by reducing its overall impact on human health (solar gain management, perfect air tightness, maximum acoustic comfort) and on the environment (high thermal insulation and product recycling at the end of its life).

FoKus® reached **54 dB in standard configuration.**

It thus perfectly meets the new energy standards: **thermal, acoustic and aeraulic.** These values are certified by the PV of the CSTB and the FCBA.

FOKUS® 205 MM

ALUMINIUM FILMED
PVC box panels covered
by aluminium sheet.

UNIVERSAL ADAPTOR
Patented set of 4 interfaces and
an underside to adapt to all joinery
ranges.

THERMO-ACOUSTIC COMPLEX
Patented, it combines acoustic
attenuation while maintaining a high
thermal level.

BIOCLIMATIC SLAT - PVC OR ALU
Micro-perforated, it provides more than
4 times the daylight and ventilation
than a standard slat.

BRACKET / SLIDE
Facilitates maintenance or
modernisation work.

OPTION : UNDERSIDE ACCESS
Provides easy and rapid access to
all the interior of the box.

Reno City®

LET'S RENOVATE THE CITY OF TOMORROW

3 active patents on the box.
Ideal for the renovation of your buildings.

A TECHNICAL RESPONSE

Under technical approval, the Reno City® is characterized as a compact box offering a **144 mm clear glazing**, while maintaining a maximum roll-up diameter of **170 mm**. Moreover, it has an **excellent thermal and acoustic insulation**.

Equipped with an integrated ALU stiffener, it allows **the realization of large width boxes (3 ml)** with a plaxed finish.

Another advantage is **the integration of a drawer, which facilitates maintenance intervention**, and the patented clip-on system of the brackets, which allows the use of narrow slides. It also accepts all market maneuvers and is **ideal for solar motorization use**.

THE CHOICE OF THE SOLAR MOTORIZATION

Reliable and easy to install, the solar motorization has many advantages and is perfectly integrated into the Reno City®.

Installed in the box, the solar motorization works with a sensor that charges the battery and powers the motor. With its integrated solar motorization, Reno City is **the only window box on the market** to offer **a completely independent window-cabinet installation that is disconnected** from the home's general electronic system.

Lame Bioclimatique®
TRADEMARK & DESIGN REGISTRATED

A Geplast Building innovation

ALUMINIUM

PVC

ITS STRENGTHS

◆ Solar gain management

Control of solar gain with **4 times more light and ventilation** in the home than a standard slat for optimal comfort in summer.

Exceptional visibility toward outside in the open position.

Regular micro-punching diffusing a soft and soothing light within the living rooms.

◆ New functionalities

Safety functions and total opacity in the closed position for optimum sleeping comfort thanks to the development of our rubber seals integrated into our sliders.

Improved acoustic comfort when raising / lowering the apron.

Integrated insect screen and blind functions.

Available in PVC or aluminium.

◆ Easy to implement

Manufacture and installation identical to a standard slat.

Ideal for large widths bay.

REGISTERED TRADEMARK AND MODEL

The shape and aesthetics of Lame Bioclimatique® are protected at European level by the European Union Intellectual Property Office (EUIPO).

Lame Bioclimatique® is a trademark of Geplast Building and is registered with the Institut National de la Propriété Industrielle (INPI).

Rails and rubber seals

It is imperative to use the PVC/ALU guides, rubber seals and end slats, without which GEPLAST declines all responsibility.

Designed and extruded in ABS and soft PVC for better resistance to heat and shrinkage, our rubber seals can be integrated with Geplast's PVC or ALU guiderails as well as with traditional and renovation guiderails on the market.

With Geplast aluminium guide :

AC101_N0004
Black rubber seals
5,3 x 5,4 mm
50 bars of 6 ml / pack

Mounting plan
on ALU guide

With Geplast PVC guide :

AC102_N0004
Black rubber seals
6,7 x 5,4 mm
50 bars of 6 ml / pack

Mounting plan
on PVC guide

With traditional aluminium guiderails and market renovations :

AC191_N0004
Black rubber seals
5 x 4,7 mm
50 bars of 6 ml / pack

AC100_N0004
Black rubber seals
5 x 4,9 mm
50 bars of 6 ml / pack

AC103_N0004
Black rubber seals
5 x 5,1 mm
50 bars of 6 ml / pack

AC117_N0004
Black rubber seals
6,7 x 5,1 mm
50 bars of 6 ml / pack

AC118_N0004
Black rubber seals
6,7 x 4,7 mm
50 bars of 6 ml / pack

AC119_N0004
Black rubber seals
6,7 x 6 mm
50 bars of 6 ml / pack

Assembly of the
rubber seal on PVC
guiderail

NB : the bioclimatic slat is
used with the PVC guide and
the coextruded joint : **JC10**

SPECIFIC MACHINES

Geplast has set up a partnership with manufacturers of machines and roller shutter end caps. These end caps, to be placed at the edges of the slats, offer many advantages :

- ◆ Reduced manufacturing time
- ◆ Easier to roll up the apron
- ◆ Keeping the slats in place against translation
- ◆ Anti-noise and anti-friction clamping system

Machine for cutting and assembling
aluminium roller shutter apron

Manual stapler

Automatic stapler

END CAP FOR 15 MM BIOCLIMATIC SLAT

AC079
10 000 pieces/box

The end cap is attached to the left and right ends of the PVC and aluminium slats. Its role is to stop the horizontal translation of the slats in order to guarantee an optimal operation of the bioclimatic roller shutter.

ALUMINIUM SLAT FORMING MACHINE

"This integration has enabled us to acquire new technical skills in-house and to fully control the production of our bioclimatic slat.

Made from 99.5% recycled aluminium strip, the *Lame Bioclimatique®* is part of a "responsible" approach. It enables us to meet the challenges of the RE2020, which now requires the control of ventilation and solar gain within homes".

Maxime Grimault
Sales & Marketing Director

In accordance with FFB guidelines, roller shutters, when deployed, can sometimes present a wavy appearance. This phenomenon is accentuated for large products. Find out more about the Quality Assessment Guide for roller shutters, available and downloadable from the websites : www.geplast.fr and www.groupe-actibaie.org.

COMPARISON
ROLLER
SHUTTER
SLATS

Lame Bioclimatique®

TRADEMARK & DESIGN REGISTRATED

"Classic" blade
43 mm

0.8 x 12mm openings
312mm² for 1m of slats
22 openwork slats for 1m height
=
6,900mm² for 1m²,
0.7 % of openings

"Micro-perforated" blade
43 mm

Holes 1.5mm diameter
588mm² for 1m of slat
22 openwork slats for 1m height
=
12 900mm² for 1m²,
1.3 % of openings

Lame Bioclimatique®
15 mm

Holes 1.5mm diameter
588mm² for 1m of slats
52 openwork slats for 1m height
=
30 600mm² for 1m²,
3% openings

3/0,7 = 4,3
Bioclimatique slat therefore has 4x more light and air than a "conventional" blade.
Normal/hemispherical light transmission factor hemispherical: $T_{vnh} = 3\%$ (PV CSTB)

Guides

> PVC GUIDES - THICKNESS 2,5 MM

By default, all our veneered PVC guides are delivered with a 12 mm passage (11 mm slat).

Practical guide

SCREWING

To screw **the guides** to your frame, we recommend two SFS screws :

SFS Screw :
SPK/5-74/GS - 4x10

SFS screw :
SPT/24 - 4,3x30 GS

The blocks are all to be fixed with an SFS reference stud screw : SPK/5-74/GS - 4x10

CONFIGURATIONS

Our range of blocks makes it easier to use the key for renovation doors with lock. It prevents the plank from rubbing on the sliding PVC casements. The VR065 filler plate includes the 120 mm guide when combined with a 40 mm tapped guide (ideal for coated joinery).

The blocks offset the panel of the joinery in the following cases :

ASSEMBLY ON TAPPED GUIDE

ASSEMBLY ON SLIDING GUIDE

ASSEMBLY ON DOUBLE GUIDE

ASSEMBLY ON LOCK HOLDER

To obtain all the technical documents, including all the installation configurations, please contact our customer service department : commercial@geplast.fr

JOINERY

 - 59 > Storage posts

Renovation joinery installations

REMOVING EXISTING FRAMES

The old joinery is removed with its frame. A new window or door is fitted with a frame to ensure a thermal seal between the joinery and the brickwork.

KEEPING EXISTING FRAMES

This type of installation implies the absolute need to maintain suitable ventilation between the old frame and the exterior trim so as not to jeopardise its durability.

Complete removal solution

ADVANTAGES OF COMPLETE REMOVAL

- Maximum daylight,
- Perfect seal,
- Practically identical appearance to installation in a new construction.

ADVANTAGES OF THE GEPLAST SOLUTION

- Can be adapted to all types of installation on the market thanks to their different widths
- Clip directly into the groove of the double-groove frame and align perfectly with the face of the frame
- The groove on the underside can accommodate compensating shims.
- Thermal improvement during installation by integrating insulation right up to the joinery,
- Installation complies with DTU 36-5.

"FLOREAL" COLORS

The "Floreal" comes from the recycling of unused resources in production, the storage posts can take different shades.

I – SCOPE OF APPLICATION

Sales by the company GEPLAST (hereinafter 'our Company' or 'us') are subject to these general terms & conditions, which the customer undertakes to fulfil unreservedly and which take precedence over any purchasing condition and any contrary clause stated in the customer's documents, unless formally and expressly waived by us.

No delay or omission by us at any given time in exercising any of these conditions may be interpreted as a waiver to us imposing the aforesaid condition. If one of the conditions specified herein were to be cancelled or rendered unenforceable upon the customer, in whole or in part, the customer would remain bound by all the other conditions.

II – FORMATION OF THE CONTRACT

Any order received from the customer, whether a proposal or a quotation issued by our company, must be the subject of an order confirmation from us, materialized by the dispatch to the customer of an acknowledgement of receipt of order (or "ARC"). If no reservation is received from the customer within 48 working hours of the dispatch of this order confirmation (ARC), the order is deemed to have been accepted, firm and definitive. The order is then irrevocable, and production begins.

This order confirmation (ARC) is binding for both us and the customer, and is authoritative in the event of any subsequent dispute. Only the order confirmation (ARC) accepted by both parties may deviate from these general terms and conditions. In the event of contradiction with the order confirmation (ARC), only the latter shall prevail.

Our plans, drawings, studies, photos, brochures, catalogs, etc., remain our entire property.

III – DELIVERY – LEAD TIMES

Unless otherwise stated in our order confirmation, delivery lead times are for guidance only and are not guaranteed. Neither compensation nor contract cancellation shall be granted in the event of delay.

However, in the event of a delay exceeding 8 weeks beyond the guide delivery date, not attributable to a *force majeure* event, the customer may ask to cancel the sale, without penalty to either party, after serving notice without effect. Deposits paid shall be returned to the customer within eight days.

The customer accepts that the products ordered should be delivered in full, or only partially subject to having been duly notified in advance.

In any event, the order can only be fulfilled if the customer is up-to-date with its obligations towards our Company.

IV – DELIVERY – TRANSFER OF RISKS – RETURNS

The delivery of our goods and their packaging materials is considered to take place in our warehouses. Risks are transferred to the customer once the goods are collected.

The customer has a time limit of 10 days after the goods are made available to be taken into the customer's possession. Beyond this deadline, the risks will be transferred to the customer, who will be liable to pay penalty storage fees equivalent to 1% of the price of the goods, per day of delay, without prejudice to other justified damages and interest.

Upon receipt, the customer or its representative is required to check the goods delivered against the order and to verify their condition.

Our Company waives all liability for errors in quantity, visible damage or defects observed after the delivery note and/or consignment note has been signed.

Defects in part of the delivery are not grounds to reject it in full.

Other than for errors compared to the order or acknowledged defects, the products may not be taken back. No product may be sent back without our prior written consent and our return shipping instructions.

For profiles delivered in metal containers, it should be noted that the containers remain the non-transferable property of our Company and must be returned to us. If not returned, the customer will be invoiced for the cost of the containers (€350 ex VAT each).

V – TRANSPORT

Unless otherwise agreed, the customer is responsible for transport of the goods.

If we provide the transport or assign it to a third-party carrier, it is expressly agreed that this is at the customer's request and risk, including when the price is specified as 'free delivery'. It is therefore the customer's responsibility to take any necessary measures in the event of damaged or missing items, in accordance with the

provisions of articles L. 133-3 *et sequor* of the French Commercial Code.

Unless formally and expressly waived by us, no clause may be considered as waiving the aforementioned rules.

VI – GUARANTEE – LIABILITY

In accordance with articles 1641 *et sequor* of the French Civil Code, our products carry the legal guarantee for hidden defects, as well as for visible defects as soon as, in the latter case, these visible defects have been reported by the customer or its representative upon receipt.

For third-party products incorporated into our own products, our Company can agree no greater guarantee than that due from and granted by the suppliers and manufacturers of the aforesaid third-party products.

In all cases, if the non-compliance or defect is acknowledged, our Company's liability shall be limited, at our discretion, either to exchanging or repairing the non-compliant or faulty product or component, or to refunding the order, to the exclusion of any compensation or damages, for any reason whatsoever, particularly for the costs of labor, dismantling, refitting, immobilization or transport, etc.

The guarantee does not apply when the conditions of storage or installation do not follow best practice, or are inappropriate or contrary to our guidelines, in the event of negligence, incorrect cleaning and inappropriate or non-compliant use of our products.

VII – PRICE – PAYMENT TERMS

Our prices are listed excluding VAT and excluding packaging, and our goods are always invoiced at the price in force on the day of the order confirmation (ARC); VAT is added at the rate in force on the invoice date. Payment costs such as transfer fees, conversion fees, customs fees, etc. are to be paid by the customer

Invoices are payable to our head office 30 days net of shipping, unless otherwise expressly agreed by us. If an order is fulfilled in several deliveries, the invoices relating to each delivery are payable as they are issued without waiting for the entire order to be fulfilled.

In addition, in accordance with the provisions of article L. 441-10 of the French Commercial Code, any delay in payment or any extension of the deadline entails *ipso jure* the application of late-payment interest calculated *prorata*, equal to the interest rate applied by the European Central Bank to its most recent refinancing operation increased by 10 percentage points.

Furthermore, any delay in payment not authorized by our Company results in liability, under a penalty clause for late payment, for fixed compensation set at 10% of the price, as well as payment of the fixed debt recovery allowance of €40 specified in article L. 441-10 of the French Commercial Code, which may be increased by the actually recovery expenses incurred (if greater than the fixed fee).

VIII – OUTSTANDING PAYMENTS – DEFEASANCE CLAUSE

In the event of failure to pay, forty-eight hours after serving notice without effect, the sale will be cancelled *ipso jure* if we so wish and our Company may seek to have the products returned, without prejudice to any other damages. Cancellation will affect not only the order in question but also all prior unpaid orders, whether they have been or are being delivered and whether or not payment is outstanding.

For payment by bill of exchange, failure to return the bill will be considered as a dishonored bill, comparable to a default of payment. Similarly, when payment is staggered, failure to pay a single instalment will result in immediate liability for the whole debt without notice being served.

In all the above cases, the sums that would be due for other deliveries or for any other reason will immediately become due if our Company does not opt to cancel the corresponding orders. Our Company may also, if it wishes, suspend fulfilment of any current order.

IX – DETERIORATION IN THE CUSTOMER'S SOLVENCY OR FINANCIAL POSITION

If the customer's solvency or financial position deteriorates, we may, at our discretion, either cancel the order or demand payment or demand additional guarantees. In the event that joint proceedings are taken against the purchaser, we will be able to cancel the order insofar as this is permitted by local law applicable to these proceedings.

X – FORCE MAJEURE – UNFORESEEN EVENTS

Any *force majeure* event will result *ipso jure* in suspension of deadlines for fulfilling our commitments and will give us the option, as applicable, to cancel them.

Under no circumstances may we be held liable if a *force majeure* event makes it impossible for us to deliver or fulfil the order.

Force majeure, in particular as understood in relation to these terms & conditions,

The future takes shape together

include but are not limited to: pandemic, war, mobilization, general or partial strike, lock-out, delay by our suppliers, machine failure, procurement problems for raw

materials, components, equipment or power, fire or any other event over which we have no control, such as to prevent or reduce manufacturing or deliveries.

In the event of a significant modification to the economic conditions in force when we accepted an order, such as to make fulfilment excessively costly for us (particularly the price of the raw material), we reserve the right to negotiate the terms of this order and to cancel it if it is impossible to reach agreement.

XI – COMPLIANCE WITH OUR RECOMMENDATIONS

Correct use of the products sold by our Company requires our recommendations to be strictly followed, in particular for selection, storage, installation, use and cleaning as specified in our manuals, guides, specifications, catalogues, maintenance sheets and other technical documents.

These documents can be freely viewed on our internet site www.geplast.fr

These documents can also be handed to the customer on request.

The customer undertakes to bring them to the attention of intermediate and end users.

In any event, the customer undertakes not to make any use or take any action with the products sold without first inquiring about any recommendations regarding the aforesaid products. Failure to follow these recommendations rules out any replacement, repair, refund or compensation of any kind.

In particular, these recommendations include, but are not limited to, the following and are no substitute for carefully reading and closely following the technical documents relating to each product and, if in doubt, first referring back to our Company:

Confirm the compatibility and suitability of the products for the customer's needs

The customer has a duty to confirm the suitability of our products and their technical features for their needs, expectations and uses they plan to make of them.

In the event it is planned to use our products in combination or incorporated with other products for which we have not previously guaranteed compatibility, whether these products come from our Company or third-parties, it is the customer's responsibility first to ensure the suitability and compatibility of the products with each other and more generally the technical feasibility of operation under reasonable conditions.

Confirm the condition of the products before use and commissioning test

The products sold by our Company, whether made from synthetic material (e.g. PVC or ABS) or plant-based/hybrid material (e.g. the Loryza range), may have small manufacturing differences, particularly in their appearance (colour differences, material imperfections, etc.) and small differences in length.

If the products are intended for a specific use, the customer should first perform tests.

Storage and cleaning conditions for the products

Products must be stored and cleaned under normal and usual conditions ensuring they retain their structure, properties and appearance, in particular with regard to unforeseen climatic, atmospheric, temperature, light or other conditions, irrespective of their source, and in all cases complying with our specific recommendations, where they exist. In general, the products must be stored out of sunlight, bad weather and moisture.

In particular, for storage, the products should be stacked on a dry flat surface, in a cool and well-ventilated place, out of the light, so as not to be distorted or discolored.

Profiles made of 100% PVC should be cleaned using warm soapy water with a soft non-abrasive sponge and rinsed with clean water. No solvent, acid, acetone-based or chlorinated product should be used. For storage, cardboard kits such as packs should be laid on a dry flat surface, in a well-ventilated place, to avoid distortion.

XII – ADVERTISING RIGHT

Any use by the customer of one of our trademarks or company name will be subject to our prior written agreement.

XIII – PERSONAL DATA

In the context of contractual relations with the customer, our Company employs computerized systems making it easier to manage the customer's order, to meet legal or regulatory obligations and to send sales documents to the customer. Some of the data collected in this way, required to agree or fulfil the contract(s), may relate to one or more identified or identifiable natural persons acting in their professional capacity. In this case they meet the qualification for personal data in the meaning of current national and European regulations. Our Company is then considered as the Data Controller.

In doing so, our Company undertakes under all circumstances to comply with the regulations applicable to processing personal data, and particularly Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 applicable with effect from 25 May 2018 (hereinafter 'GDPR') and French law⁷⁸⁻¹⁷ of 6 January 1978 on data processing, files and freedoms.

Our Company also undertakes only to involve or work with contractors or partners that also comply with them.

In compliance with the regulations, these data are stored for the duration of the commercial relationship between our Company and the customer, then for a period of 3 years following its end, for statistical purposes, without prejudice to any legal or regulatory obligations for data archiving when they exist and storage made necessary to establish proof of a right or a contract that can be archived in accordance with the provisions of the French Commercial Code.

In any event, natural persons affected by processing of data about them have a right of access, rectification, erasure, restriction of processing, opposition or data portability, the right not to be affected by automated decision-making (including profiling) and a right of appeal to the CNIL (French data protection commission).

XIV – RETENTION OF OWNERSHIP

PRODUCTS SOLD REMAIN OUR PROPERTY UNTIL EFFECTIVE PAYMENT OF THE ENTIRE PRINCIPAL AND INCIDENTAL PRICE. IN THIS RESPECT, PROVIDING A BILL OF EXCHANGE OR ANY OTHER SECURITY CREATING AN OBLIGATION TO PAY DOES NOT CONSTITUTE PAYMENT IN THE MEANING OF THIS CLAUSE.

FAILURE TO PAY ANY OF THE INSTALMENTS MAY RESULT IN DEMANDS TO RETURN THE PRODUCTS. CUSTOMER UNDERTAKES, UNTIL PAYMENT OF THE FULL PRICE AND SUBJECT TO AN IMMEDIATE DEMAND BY OUR COMPANY TO RETURN THE PRODUCTS, NOT TO TRANSFORM NOR INCORPORATE THE AFORESAID PRODUCTS, NOR TO RESELL THEM OR PAWN THEM.

IN ANY EVENT, THE PRODUCTS STILL IN THE CUSTOMER'S POSSESSION ARE CONSIDERED TO BE THOSE FOR WHICH PAYMENT IS OUTSTANDING.

THE CUSTOMER ALSO UNDERTAKES TO NOTIFY US IMMEDIATELY OF ITS SUSPENSION OF PAYMENTS, OR TO SUBMIT ITSELF OR BE SUBJECT TO JOINT PROCEEDINGS FOR RECEIVERSHIP OR COURT-SUPERVISED WINDING UP ON REPORT OF EXISTENCE IN ITS STOCK OF UNPAID GOODS BELONGING TO US AND TO SUPPLY US ANY INFORMATION ENABLING US TO DEMAND THE RETURN OF GOODS FROM SUBSEQUENT PURCHASERS.

THESE MEASURES ARE NO OBSTACLE TO TRANSFER TO THE CUSTOMER, AT DELIVERY, THE RISKS OF LOSS OR DAMAGE OF THE PRODUCTS SOLD, AS WELL AS DAMAGE THAT THEY COULD CAUSE.

XV – APPLICABLE LAW – SETTLEMENT OF DISPUTES

ALL DISPUTES RELATING TO OUR SALES AND TO FULFILMENT OR INTERPRETATION OF OUR GENERAL TERMS & CONDITIONS OF SALE ARE SUBJECT TO FRENCH LAW AND WILL BE SOLE JURISDICTION OF THE NANTES (FRANCE) COMMERCIAL COURT, EVEN FOR A GUARANTEE CLAIM OR WHERE THERE ARE MULTIPLE DEFENDANTS.
